

The Launch of Graphite 1.0-ish

aka the cage match between 0.9.x and 0.10.0

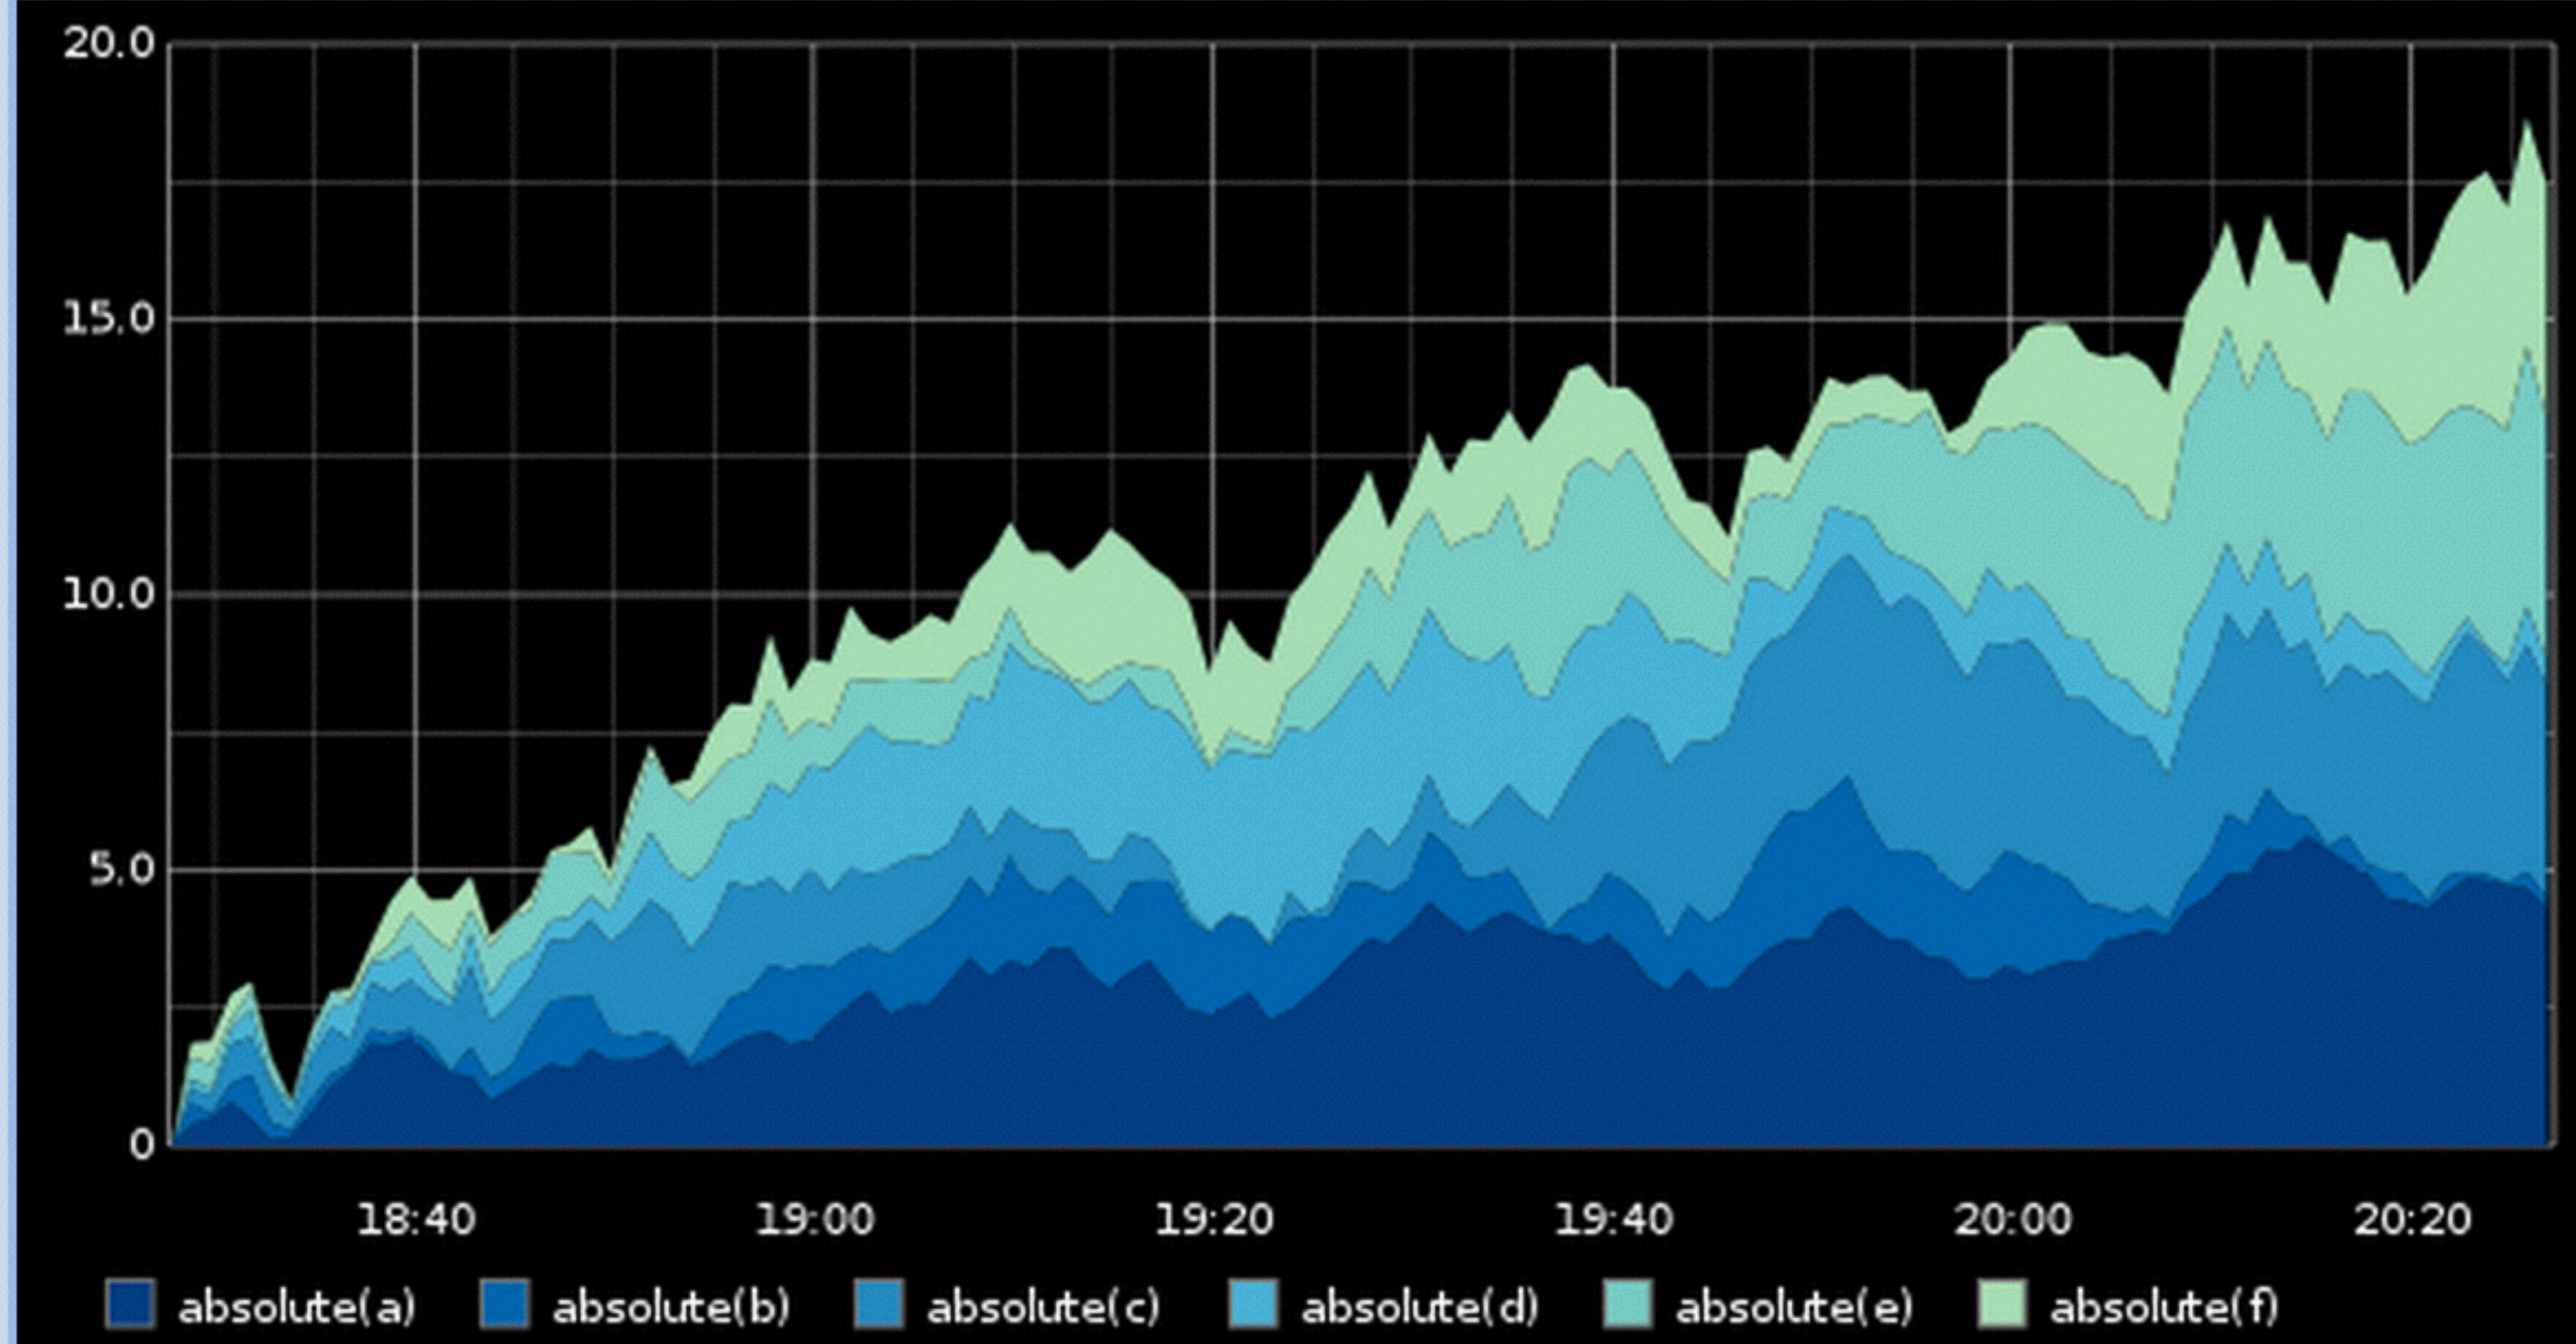

what is graphite?

Graphite Composer

how did we get here?

[http://www-aosabook.org/en/
graphite.html](http://www-aosabook.org/en/graphite.html)

O'REILLY®

Early Release
RAW & UNEDITED

Monitoring with Graphite

TRACKING DYNAMIC HOST AND APPLICATION METRICS AT SCALE

Jason Dixon

the changing tsdb
landscape

the not-so-secret
secret about tsdb's

the ~~future~~ now of graphite

not 0.9.x

but I love 0.9.x

ok, so what now?

live demo 

highlights

pluggable storage finders

- standard (whisper, rrd)
- ceres
- Cyanite (external, Cassandra-based)
- KairosDB (external)
- OpenTSDB (external)
- < your custom finder here >

pluggable carbon
protocols

zomg so much test
coverage special thanks
to @brutasse @cbowman0

improved brace
expansion and globstar
support

MAKE GIFS AT GIFTSOUP.COM

improved unicode,
timezone, and special
char support throughout

updated requirements

- Python 2.7
- Django 1.9 (graphite-web)
- Twisted 13.2+ (carbon)

new (optional) components

- Carbonate (rebalancing suite)
- Ceres (experimental tsdb)

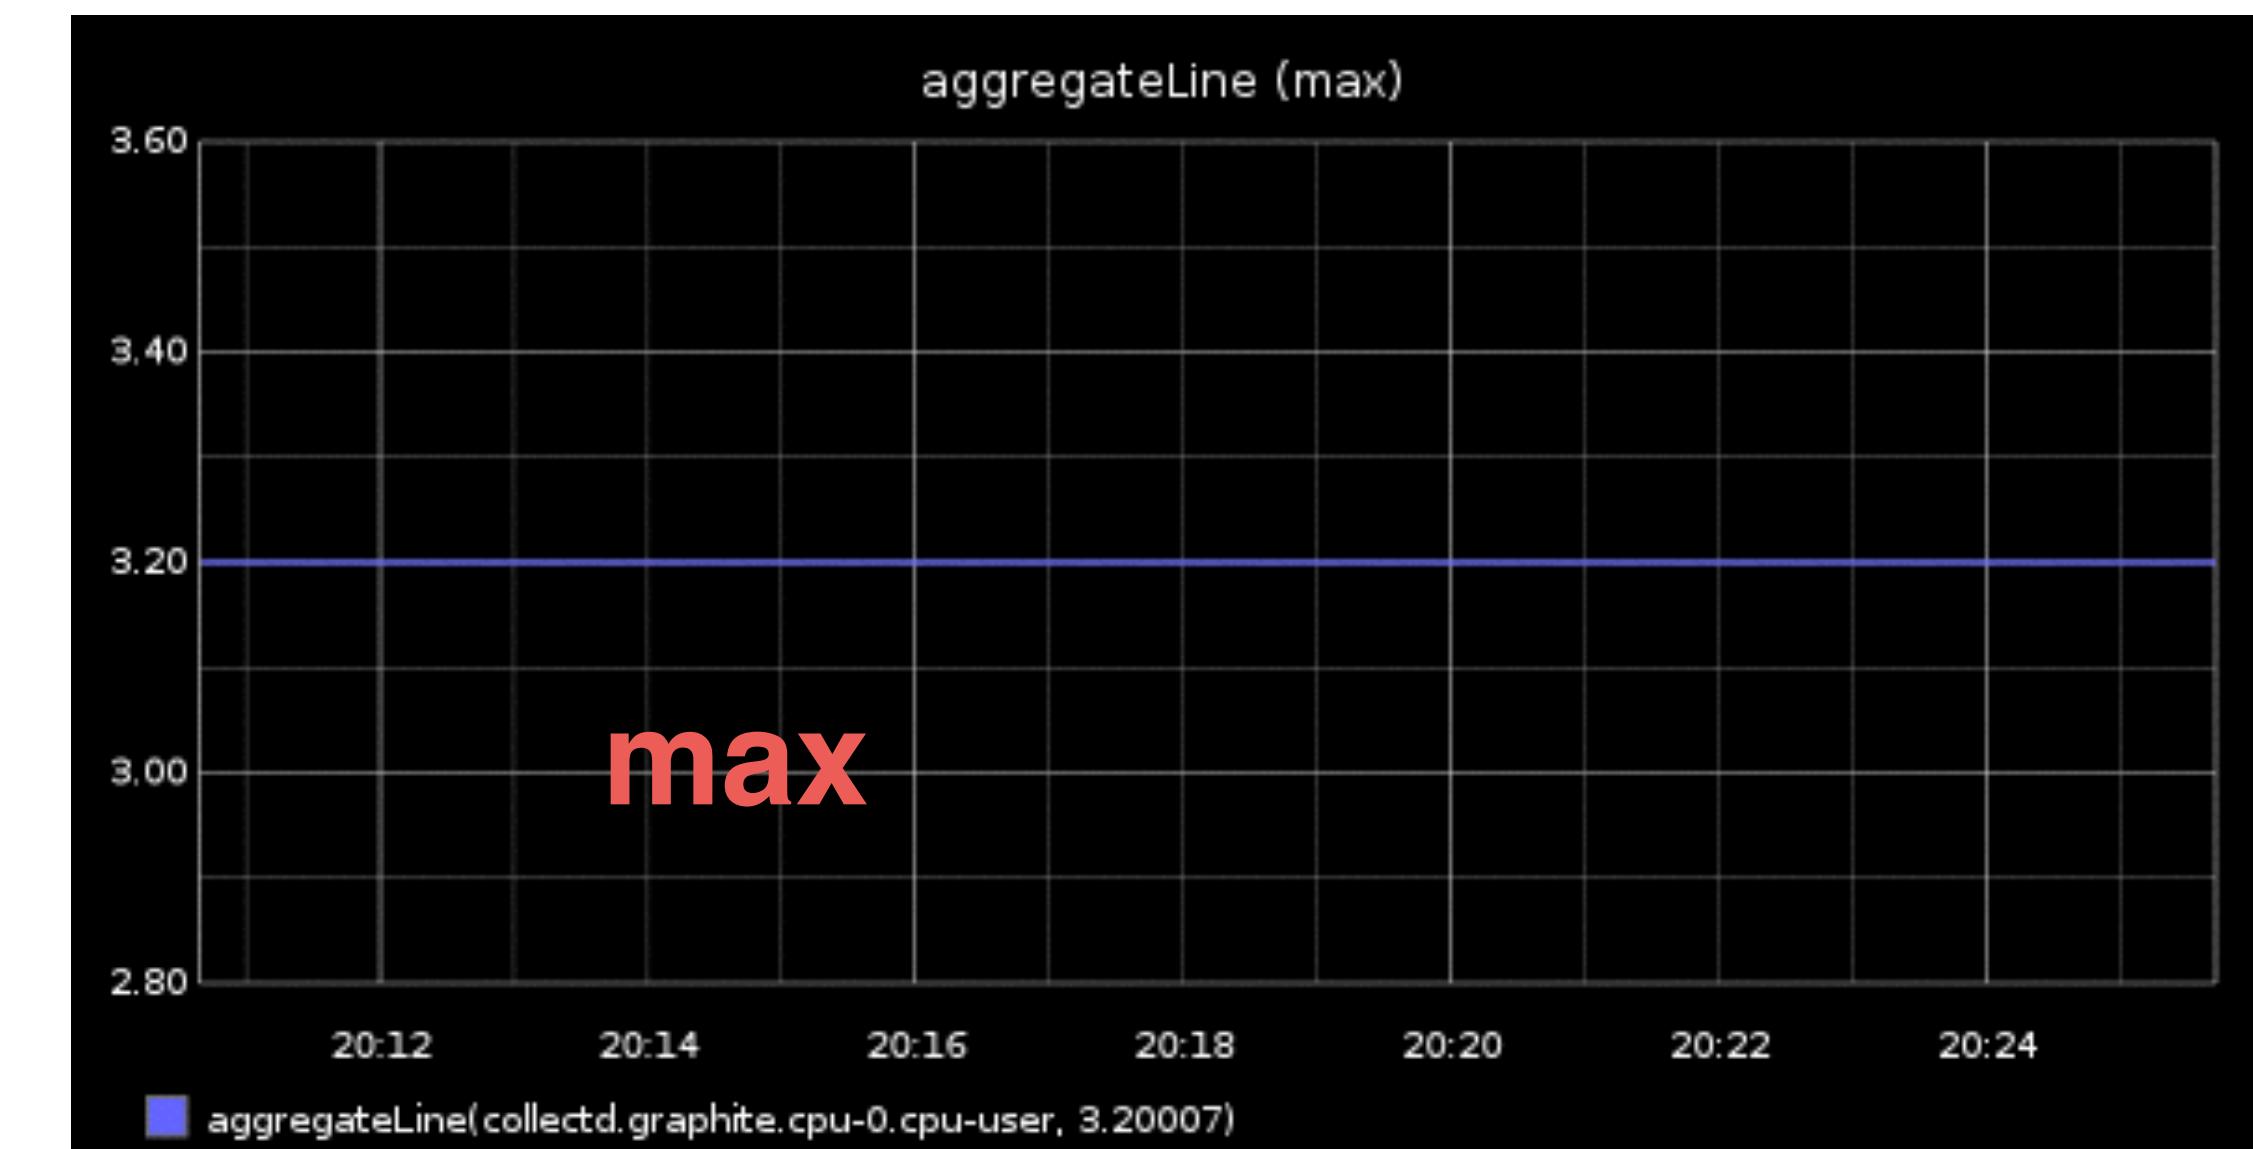

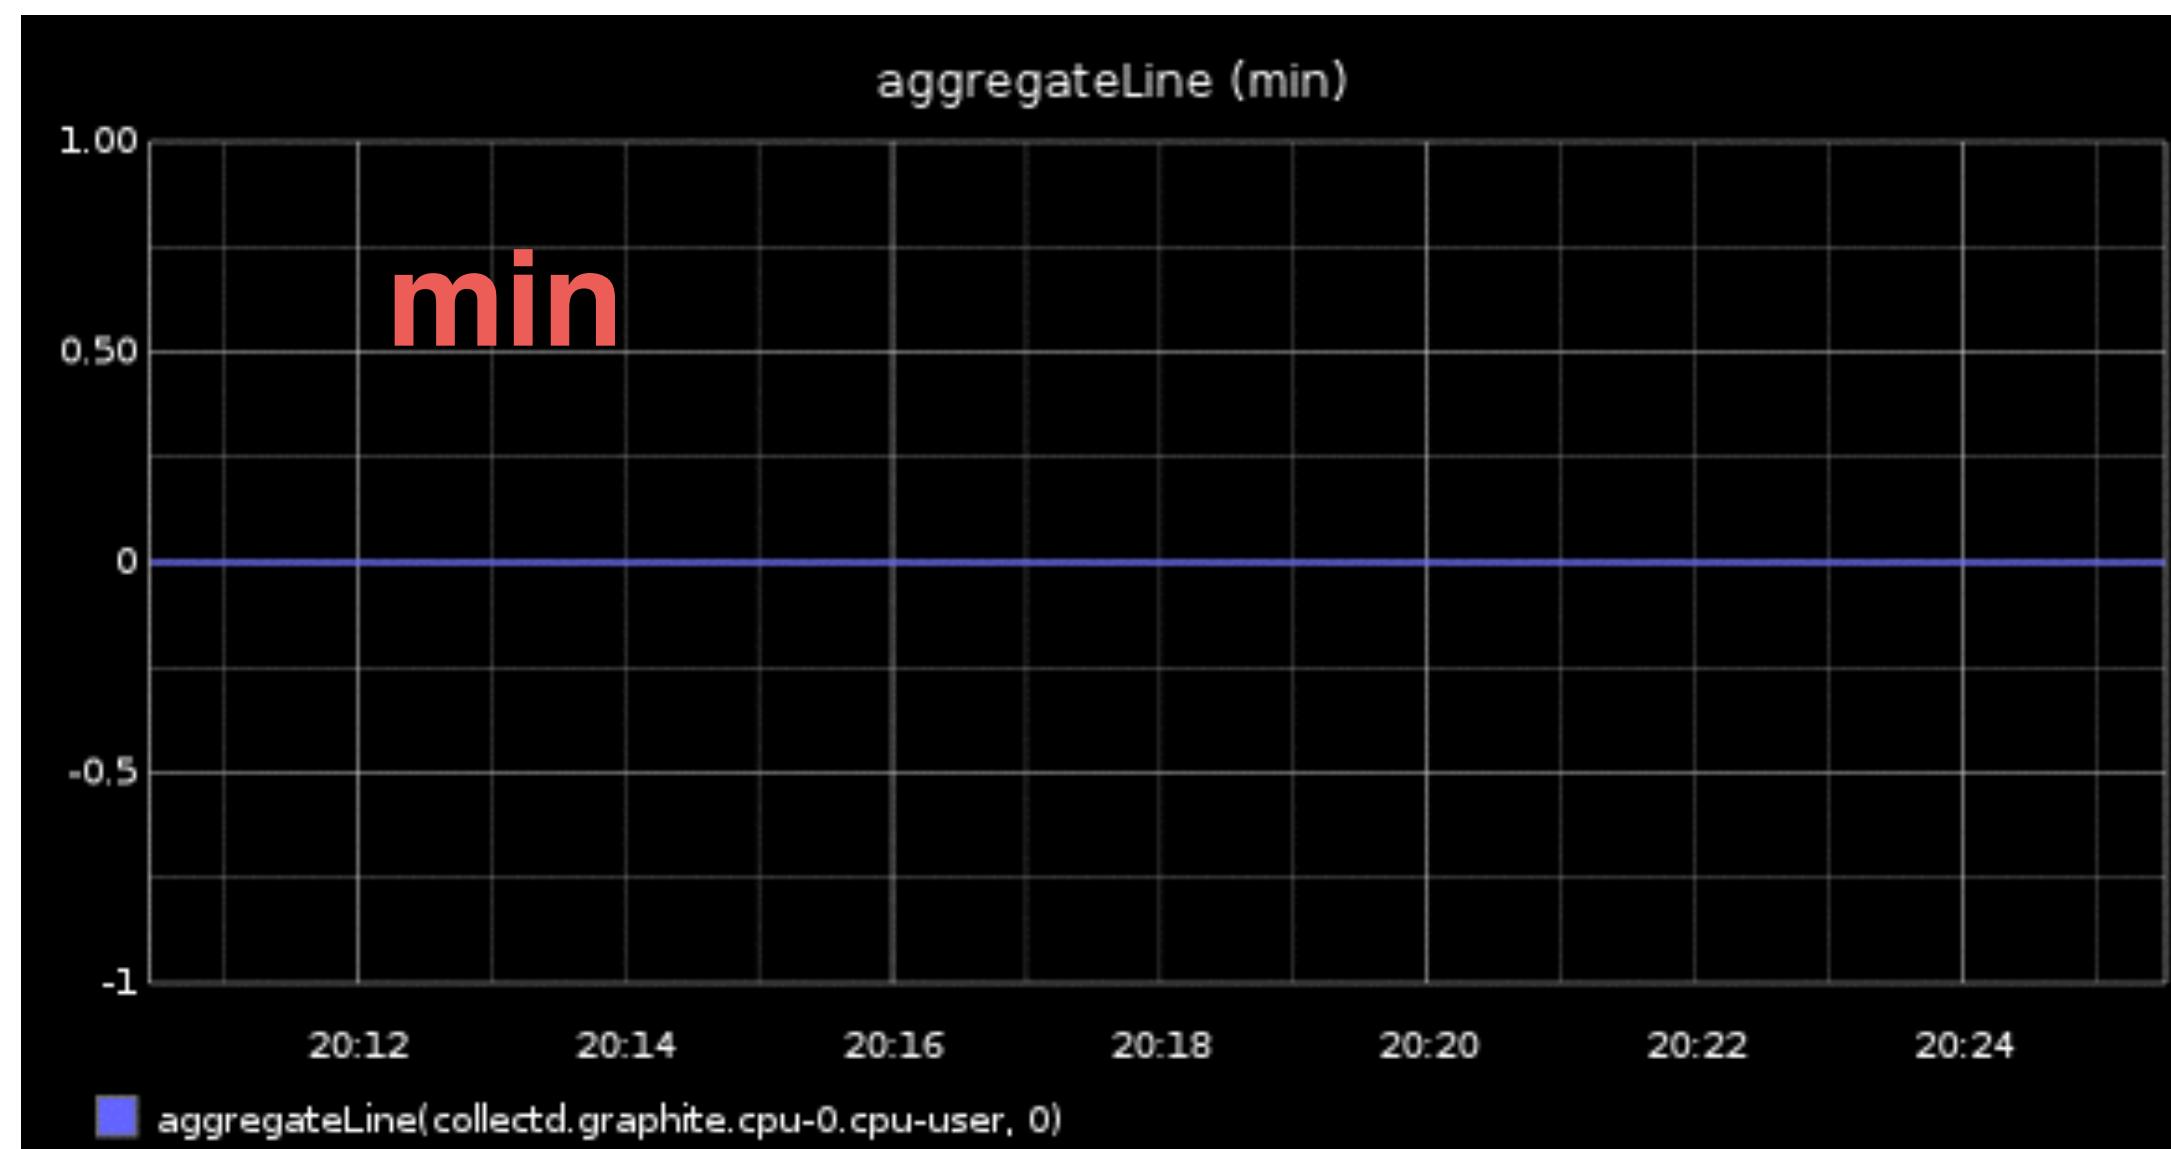

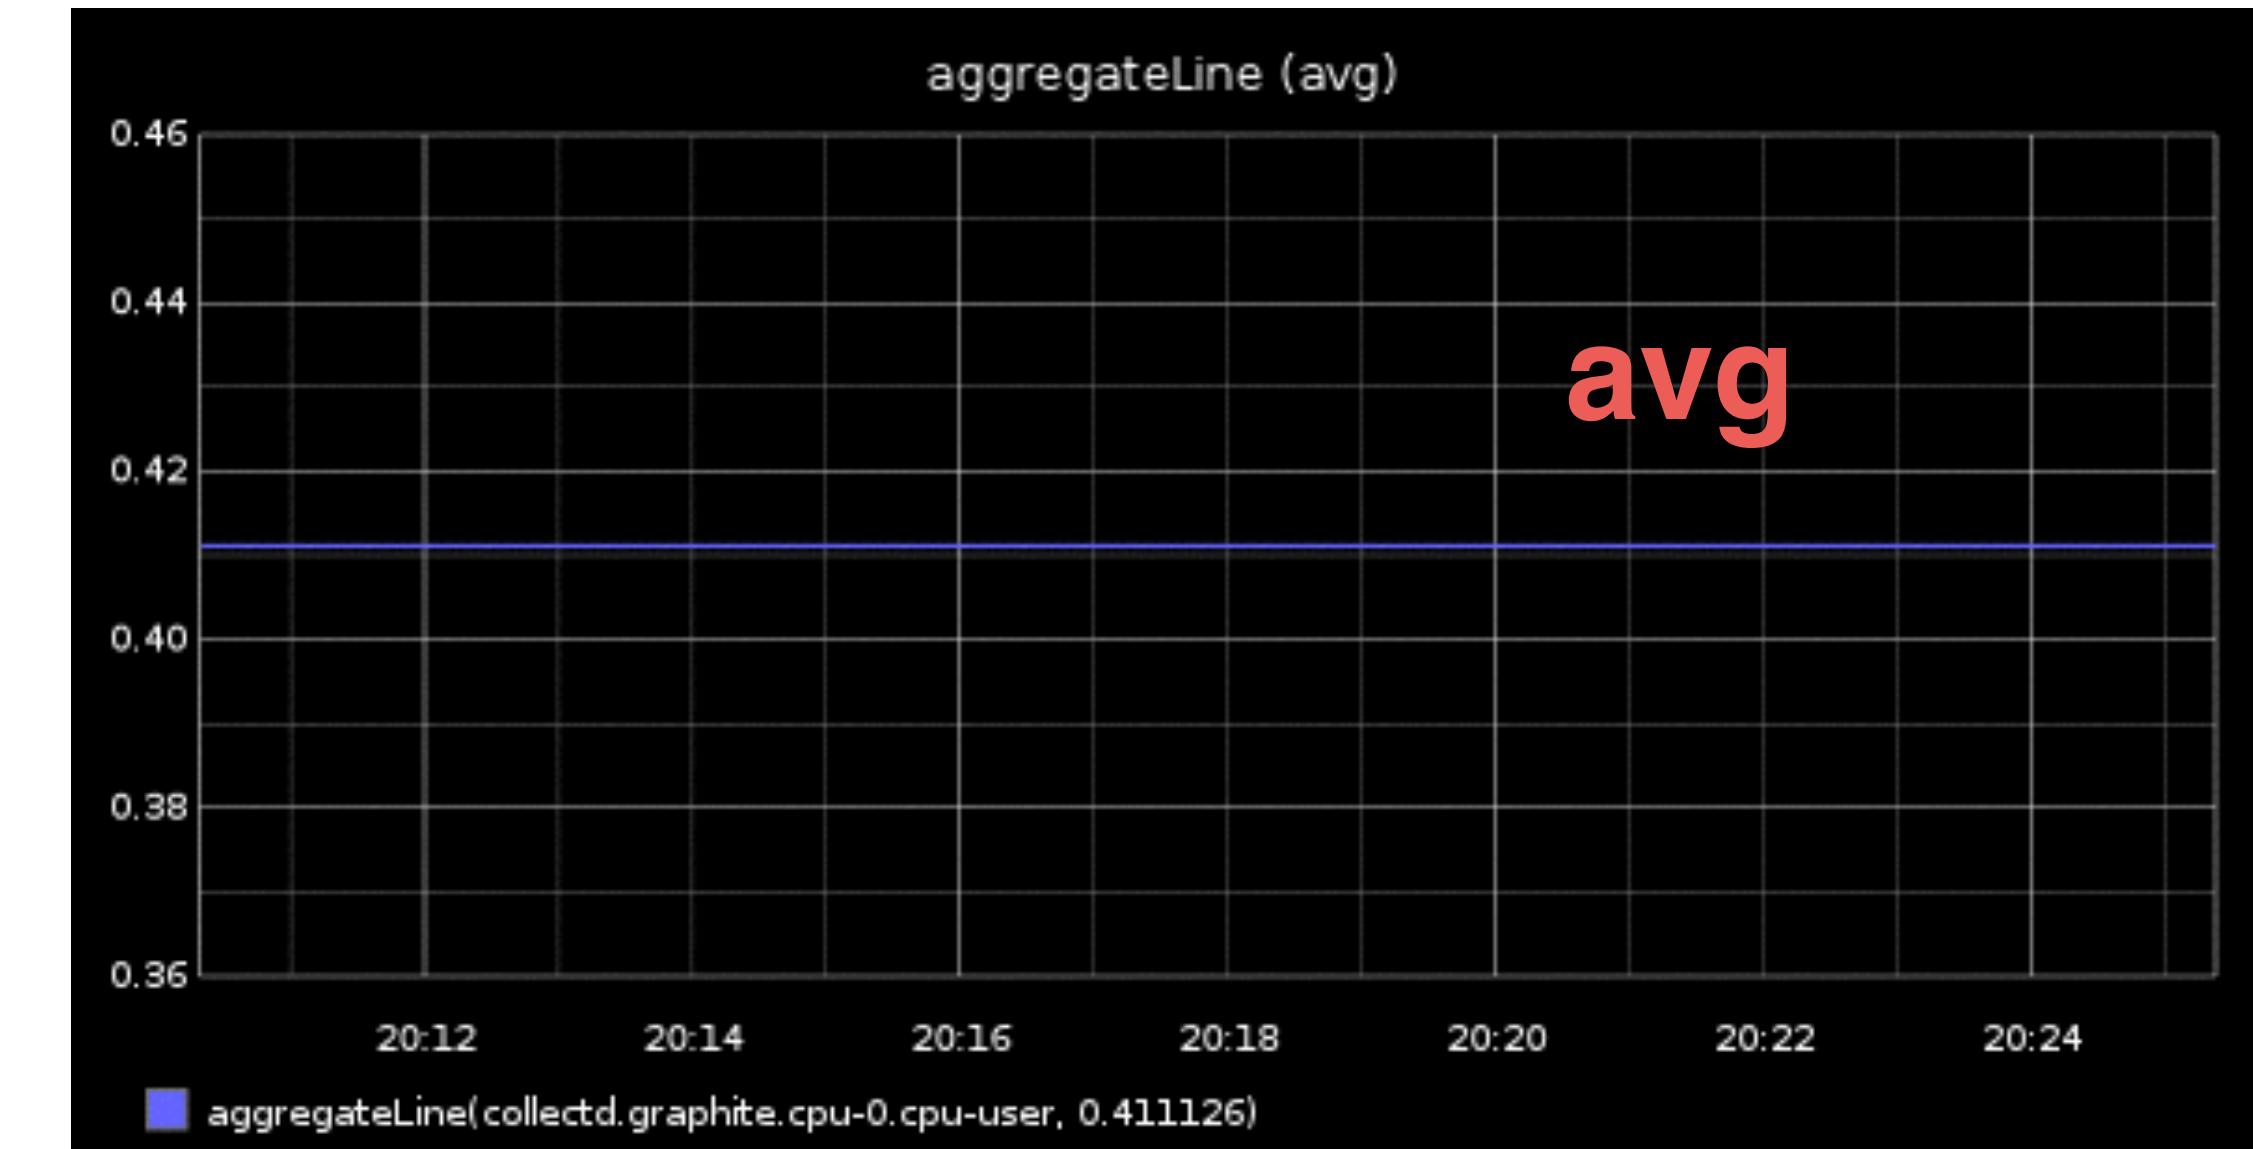

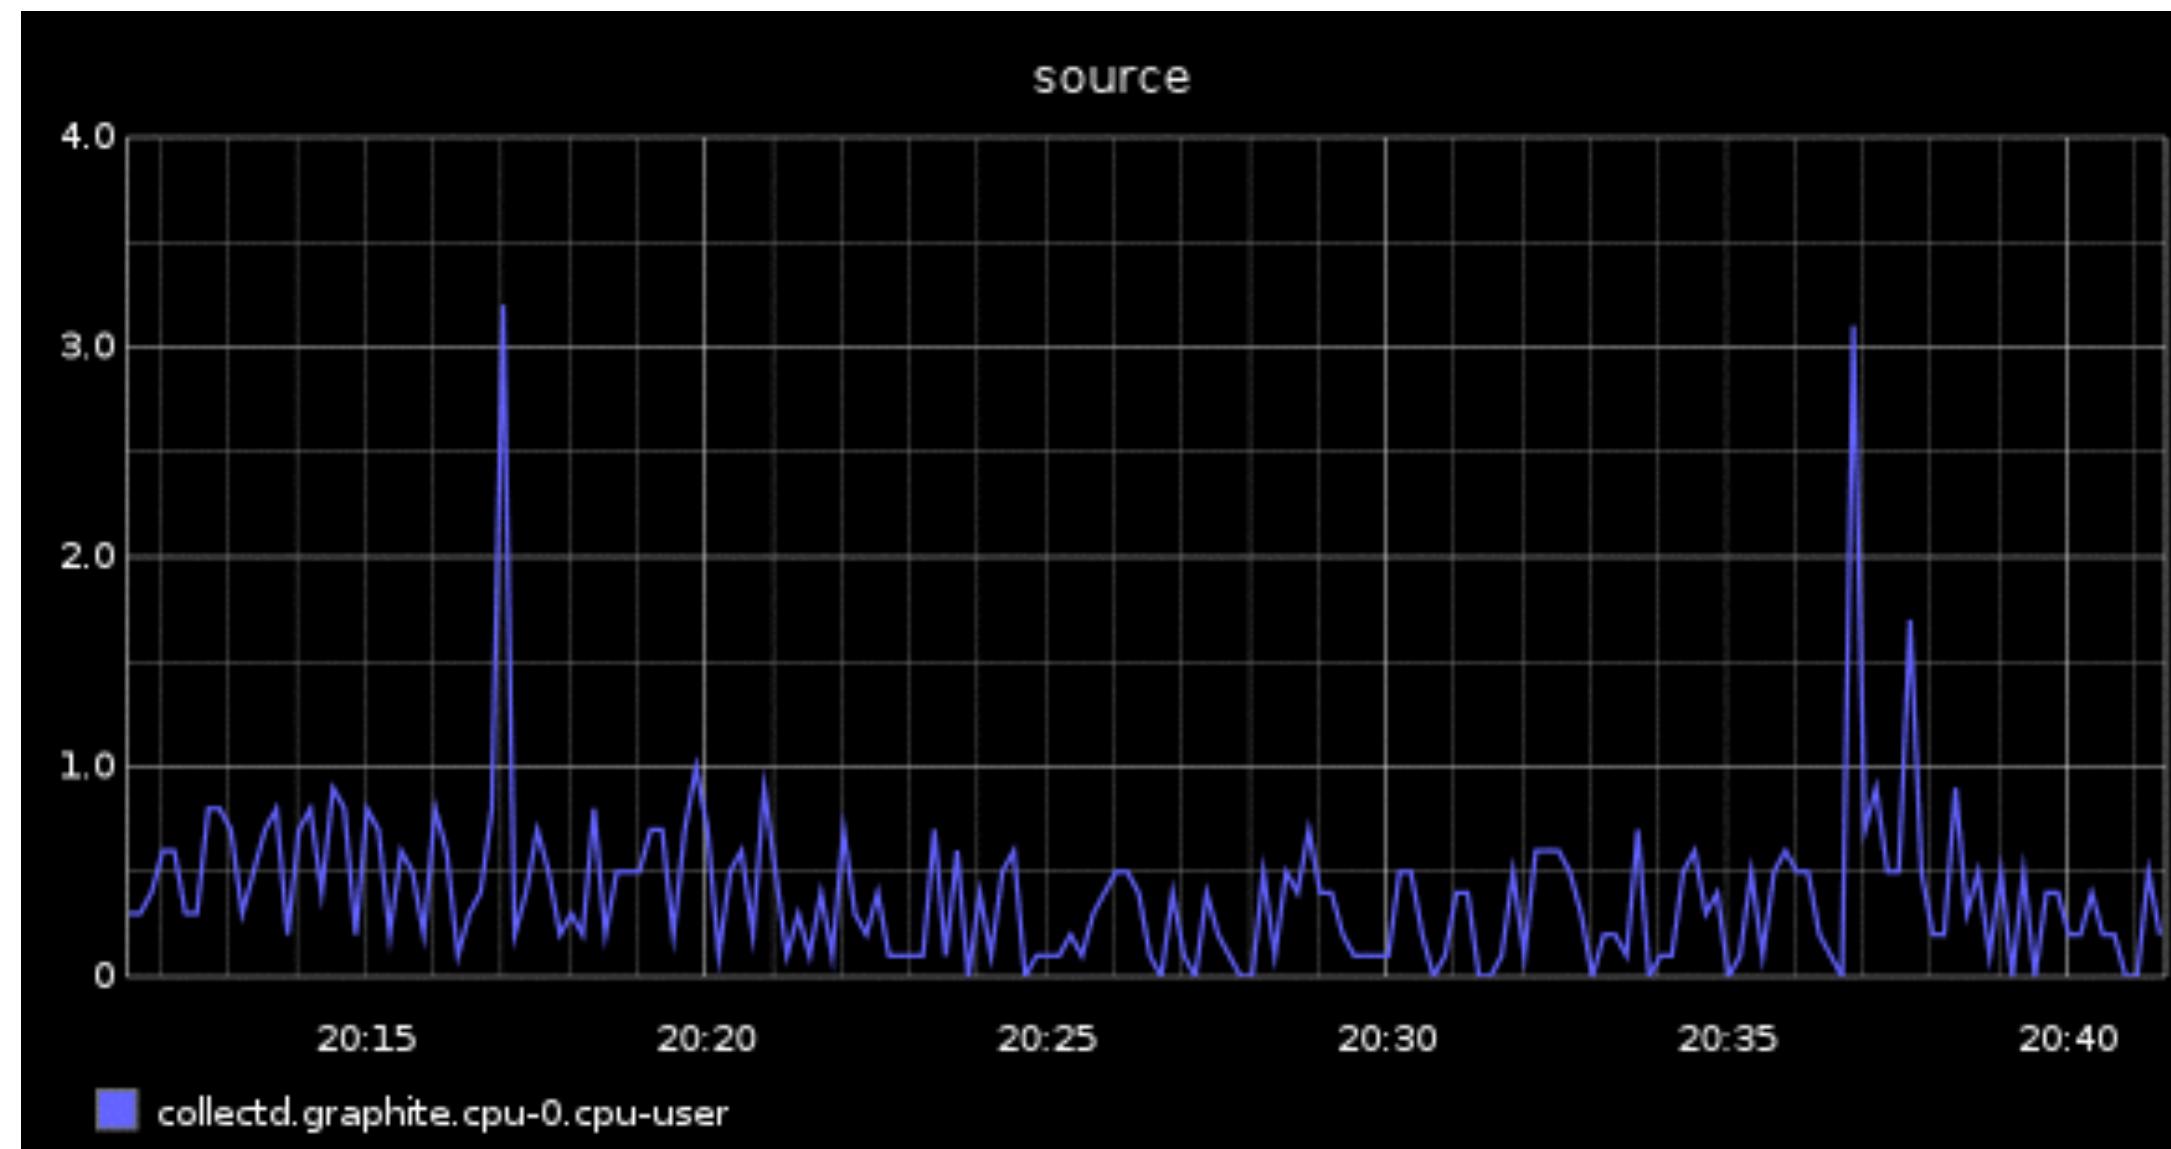

zomg new functions

MORE RENDER FUNCTIONS

EVERYONE GETS A RENDER FUNCTION

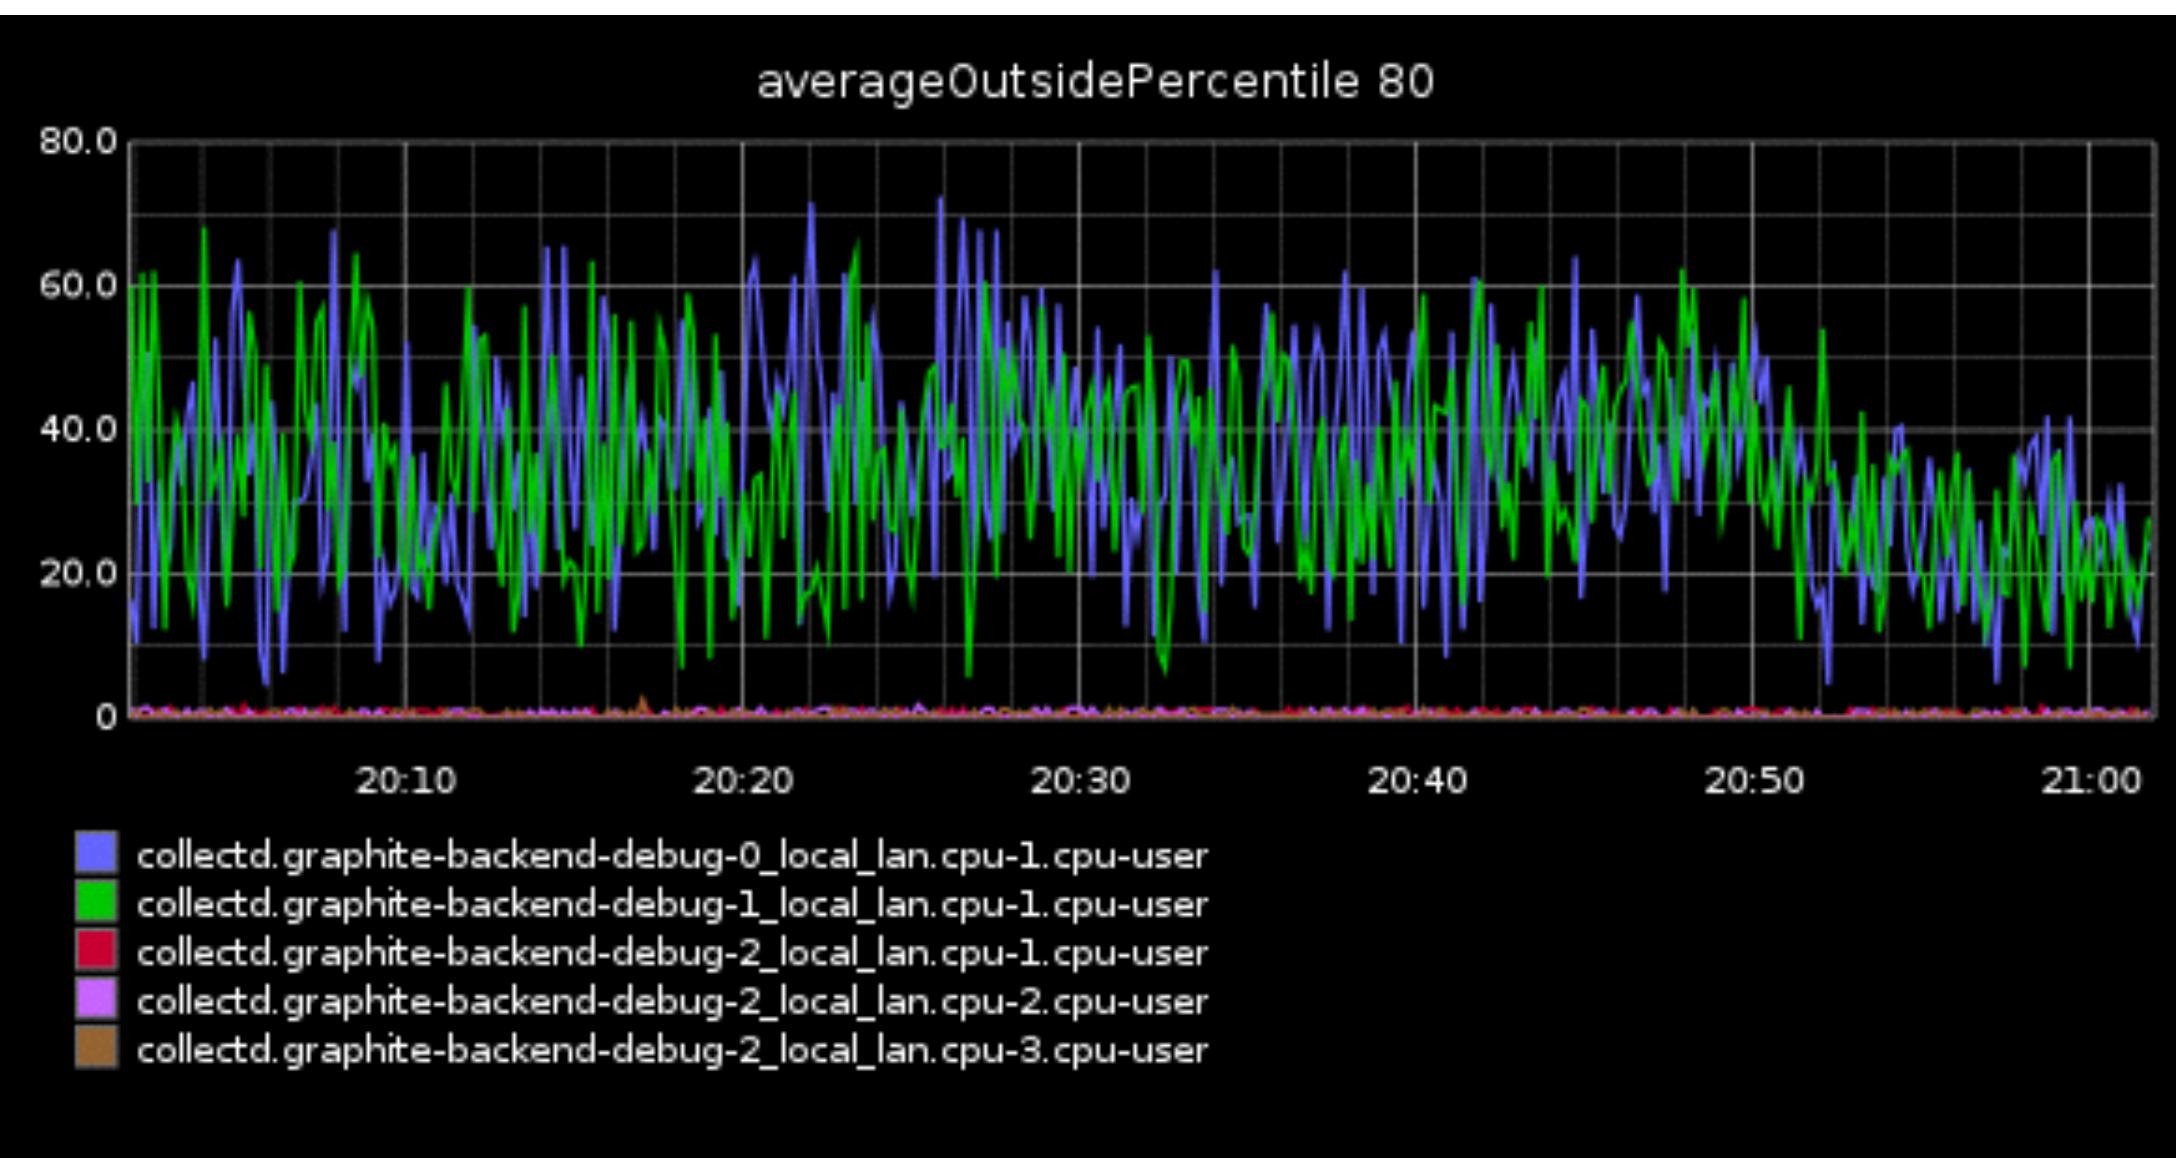

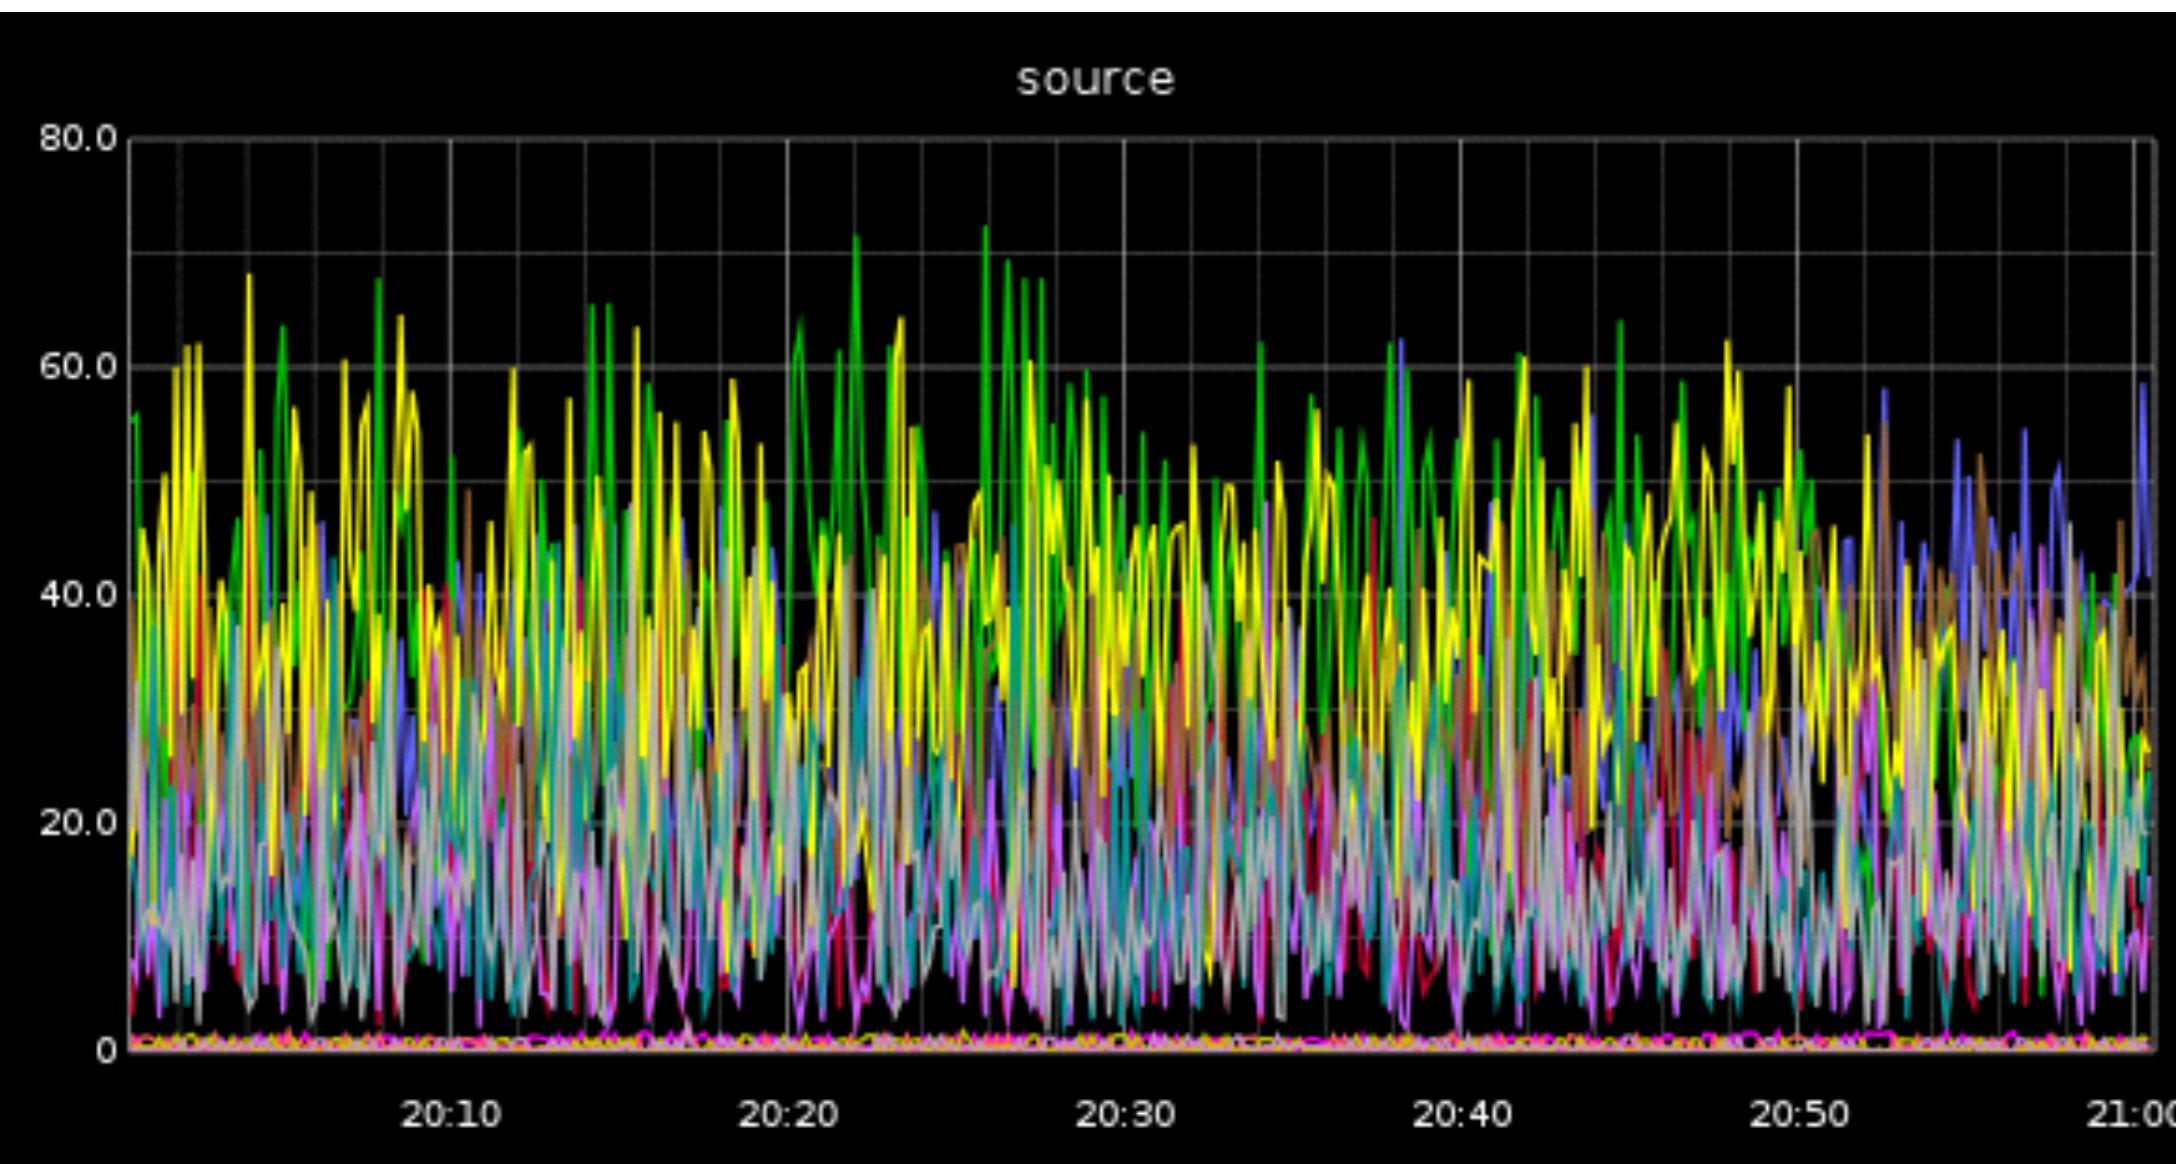

aggregateLine

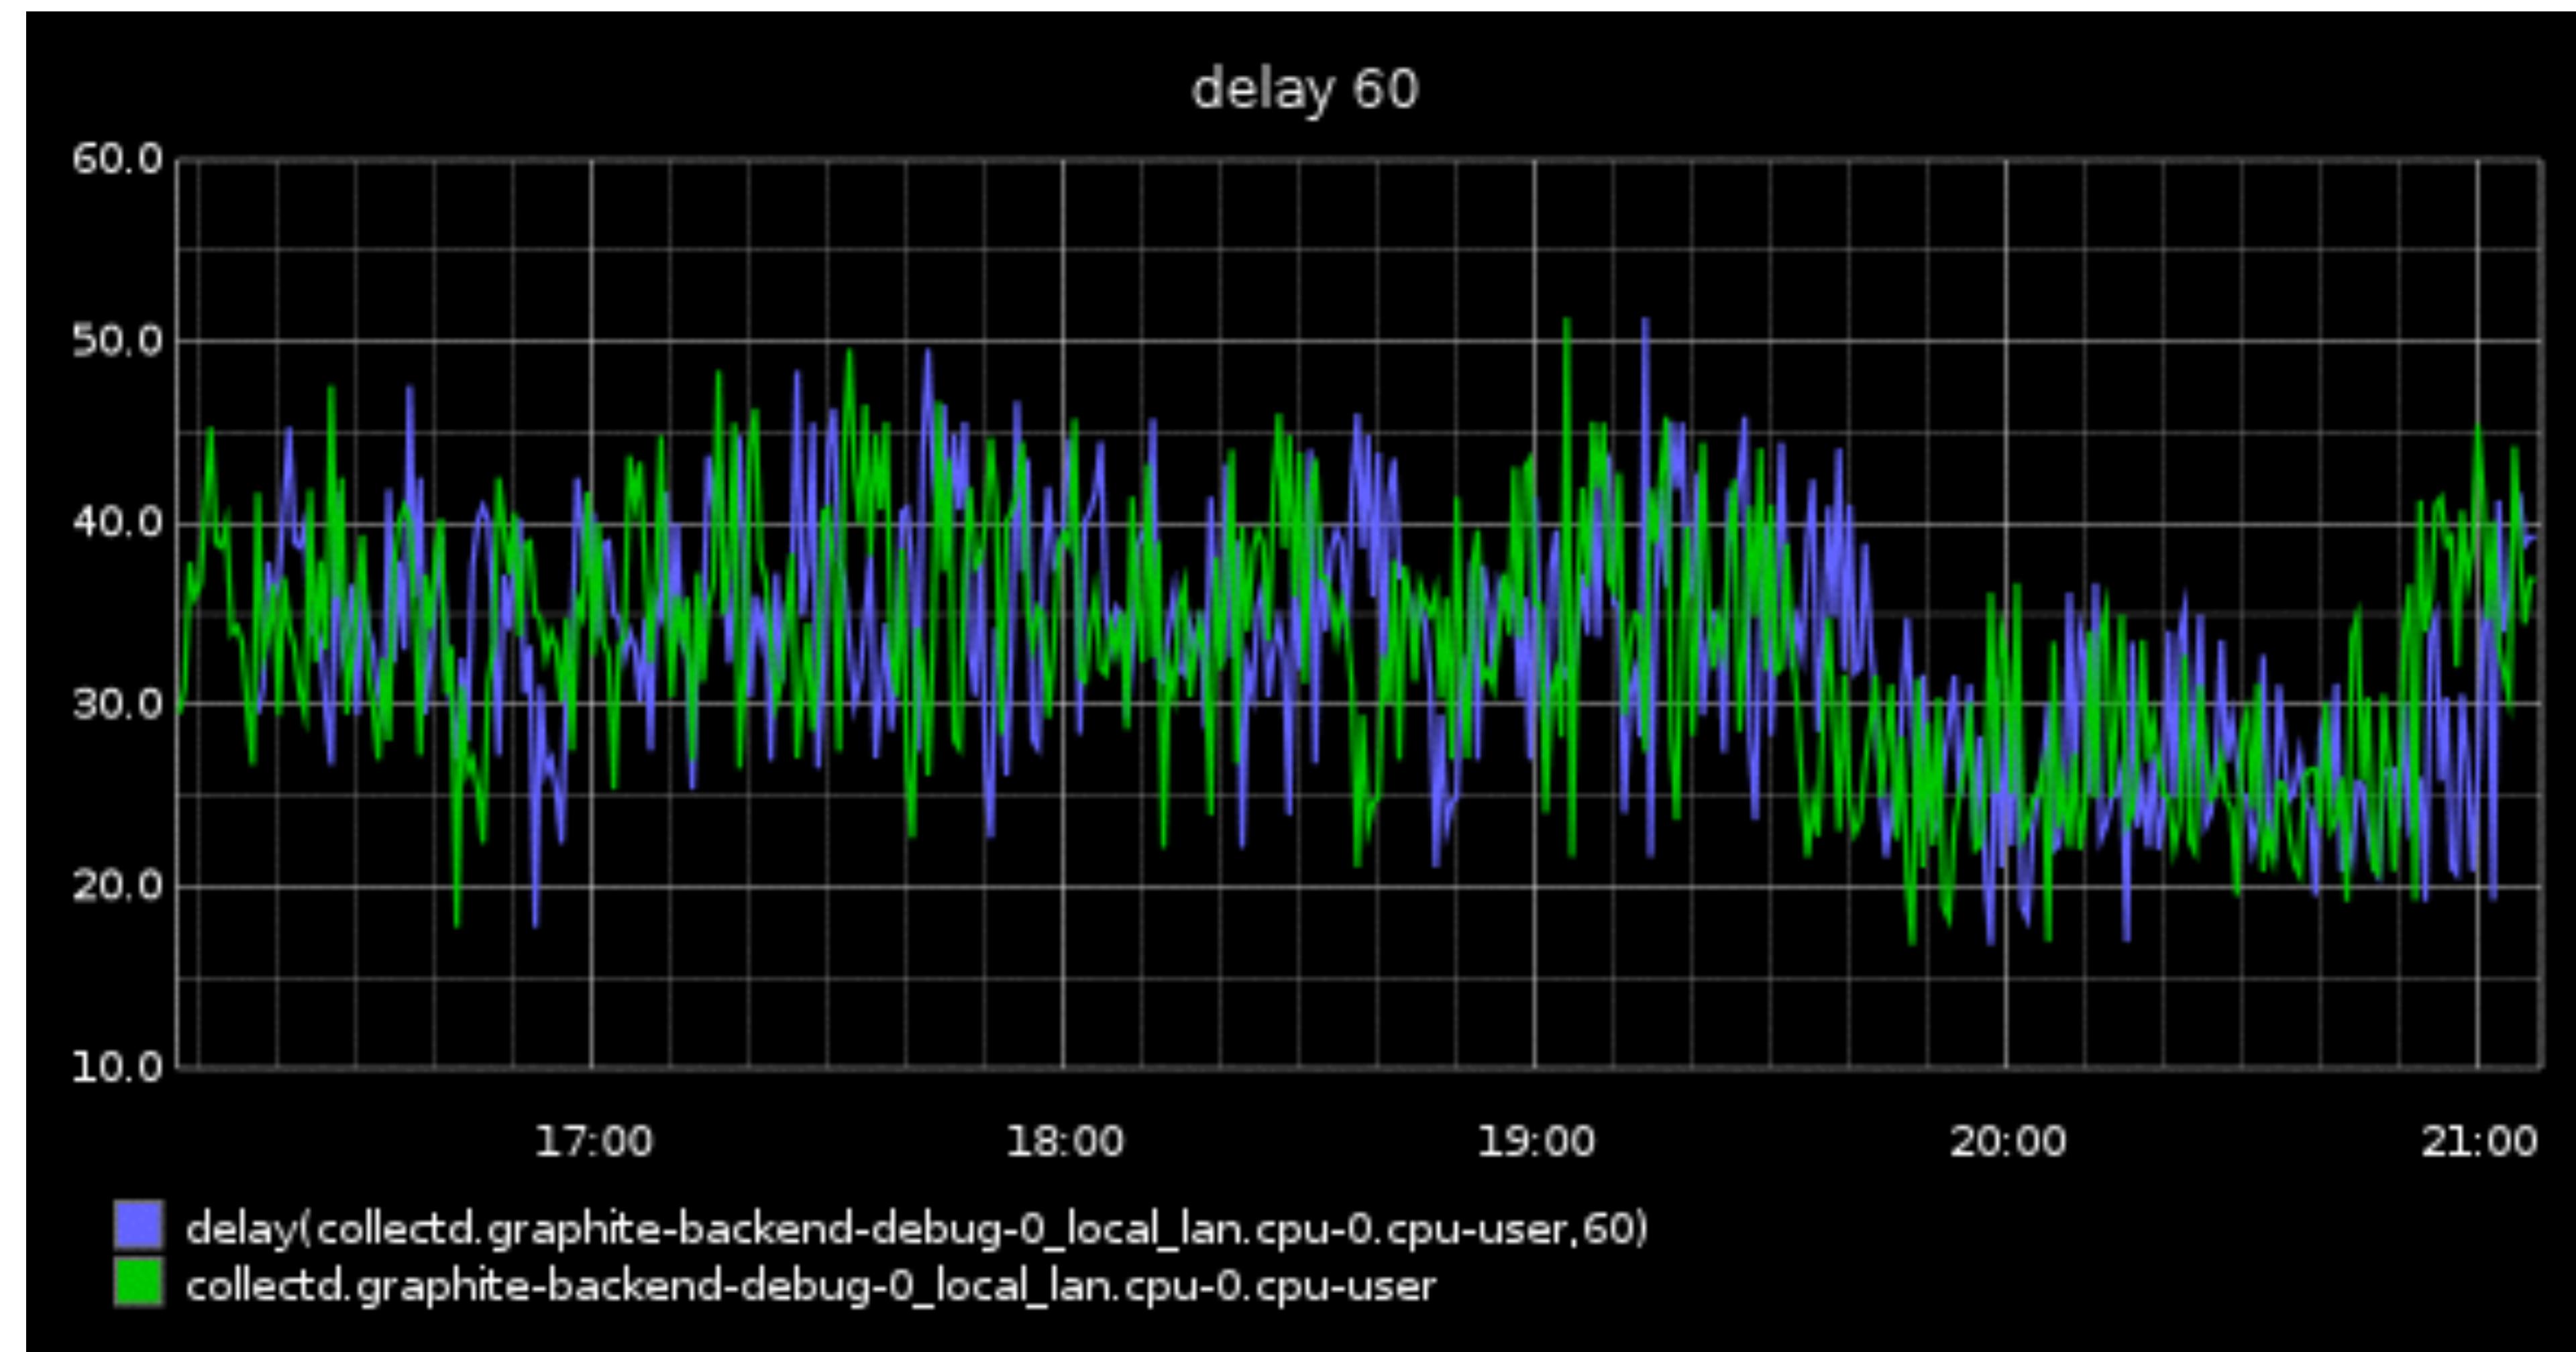

applyByNode

i tried i really did but you
should just go read the
`applyByNode` function docs
because omg i can't even

averageOutsidePercentile

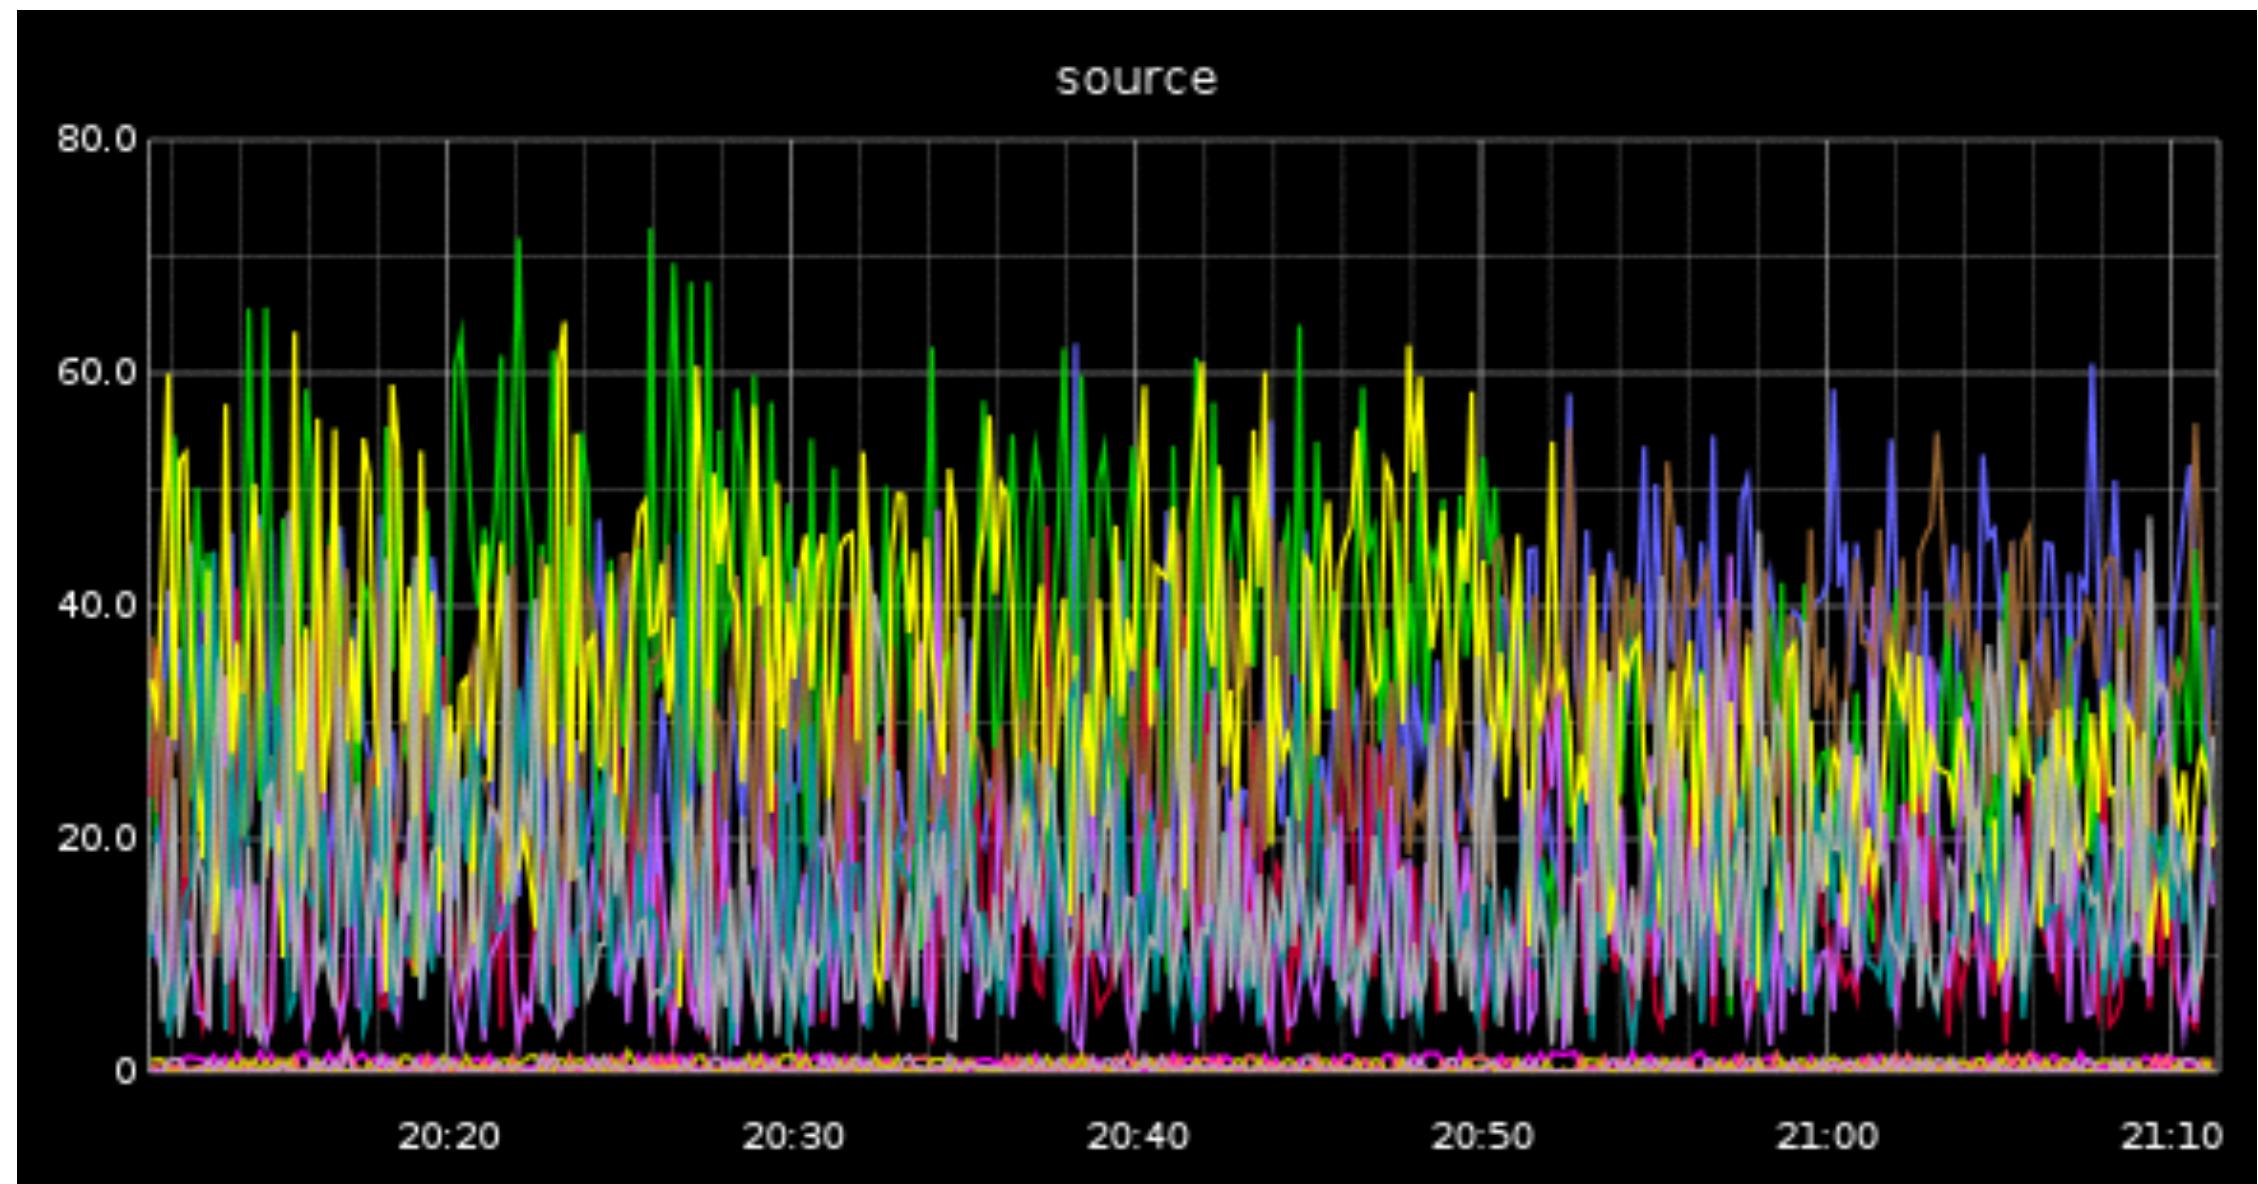

delay

fallbackSeries

```
fallbackSeries(foo.requests,  
              constantLine(0))
```

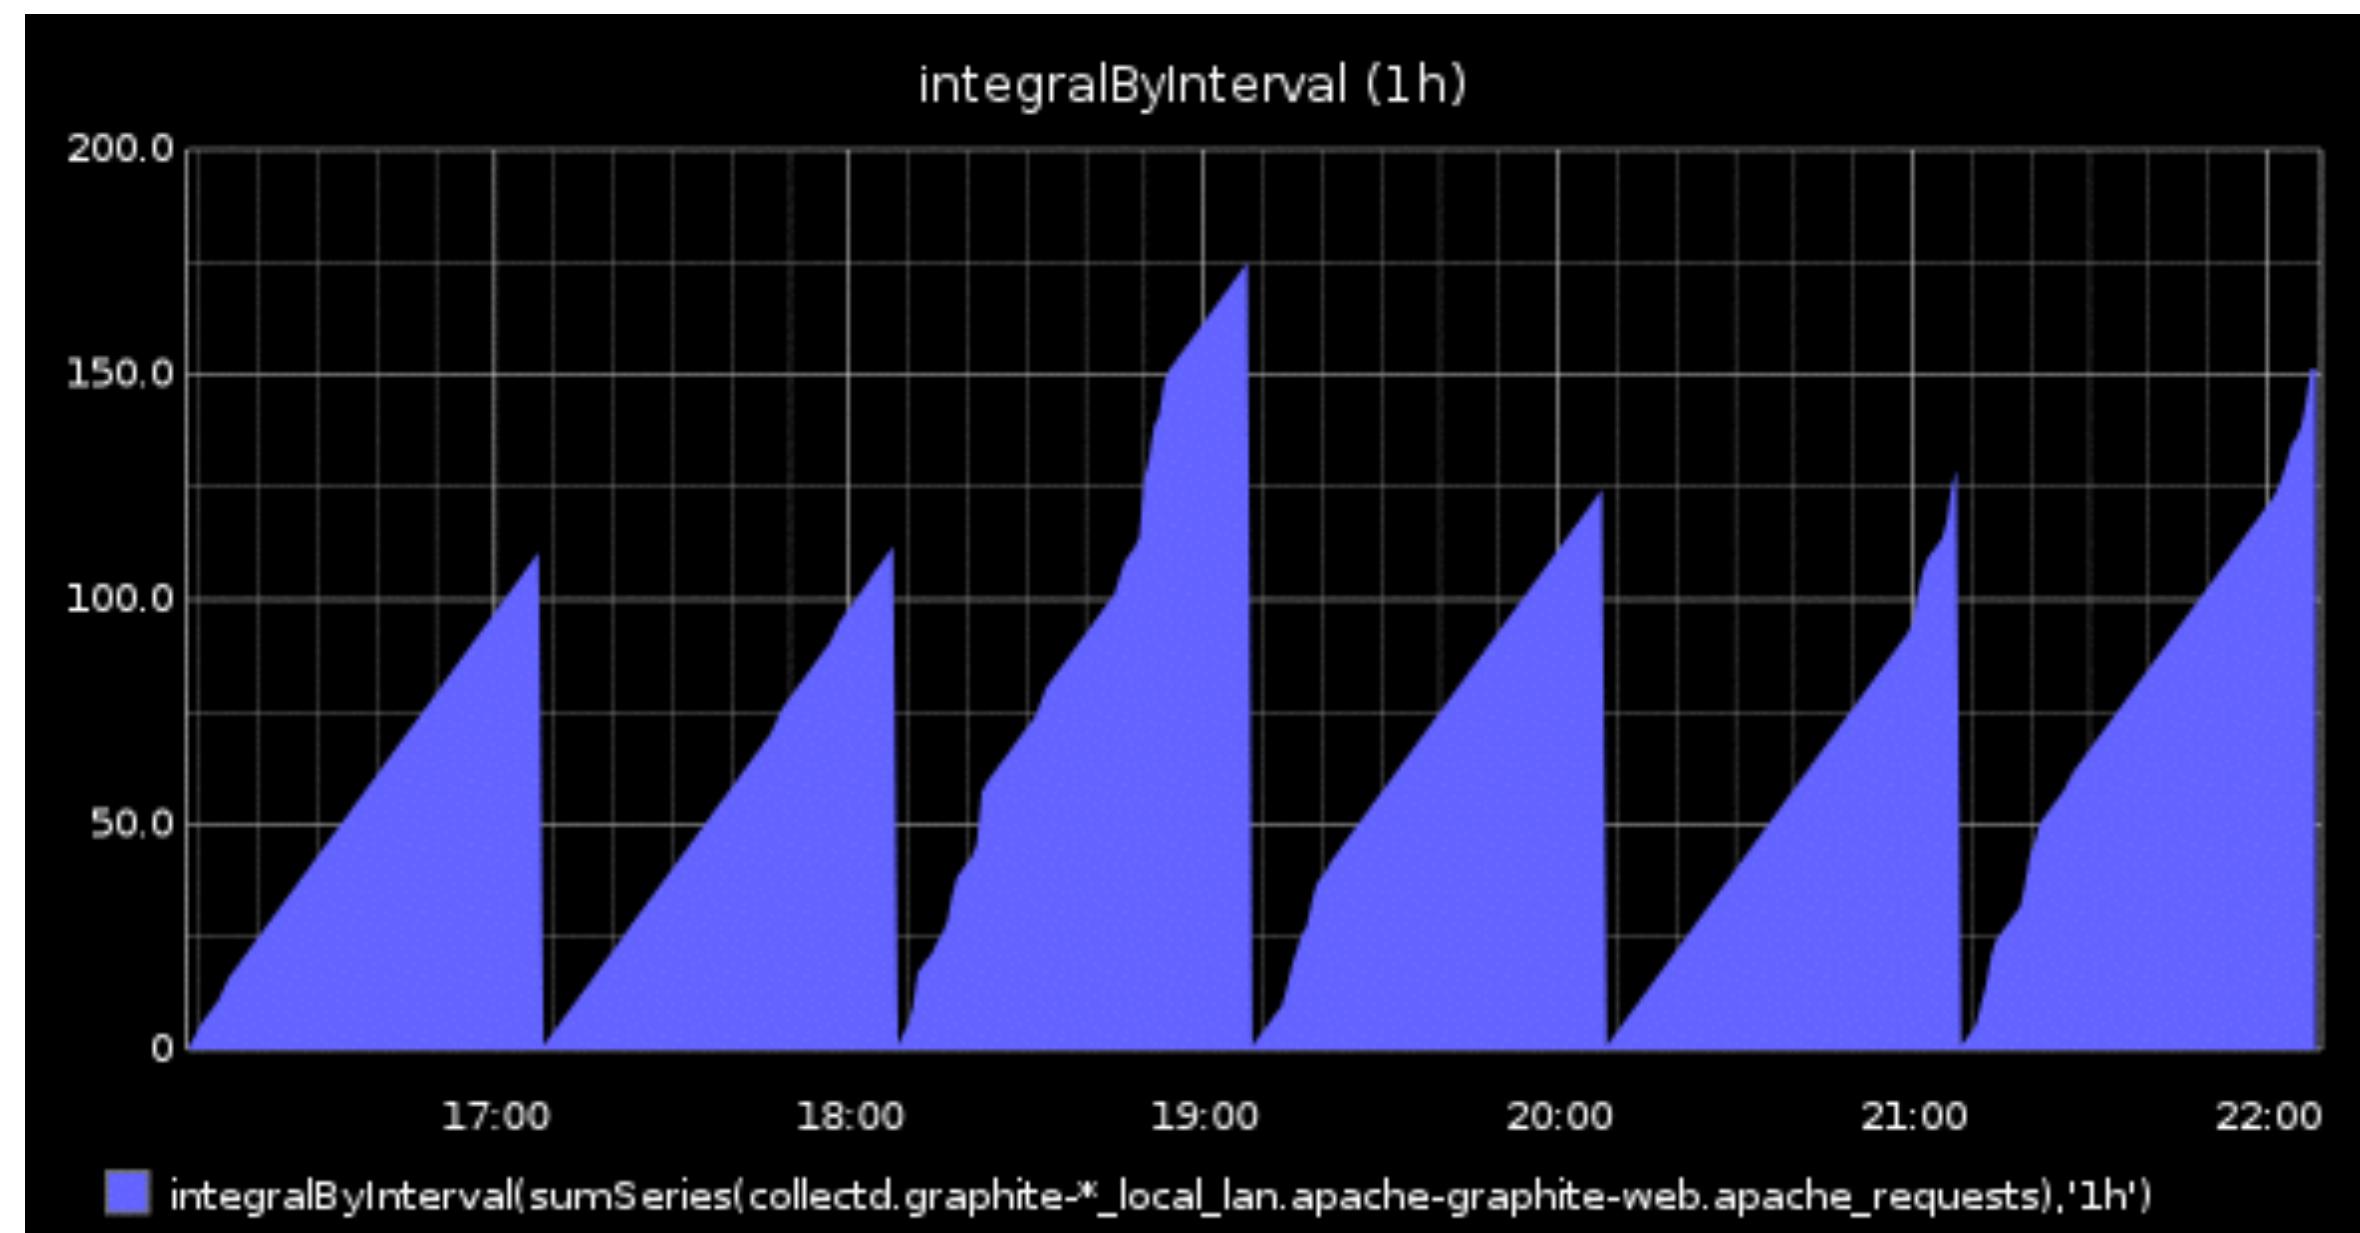

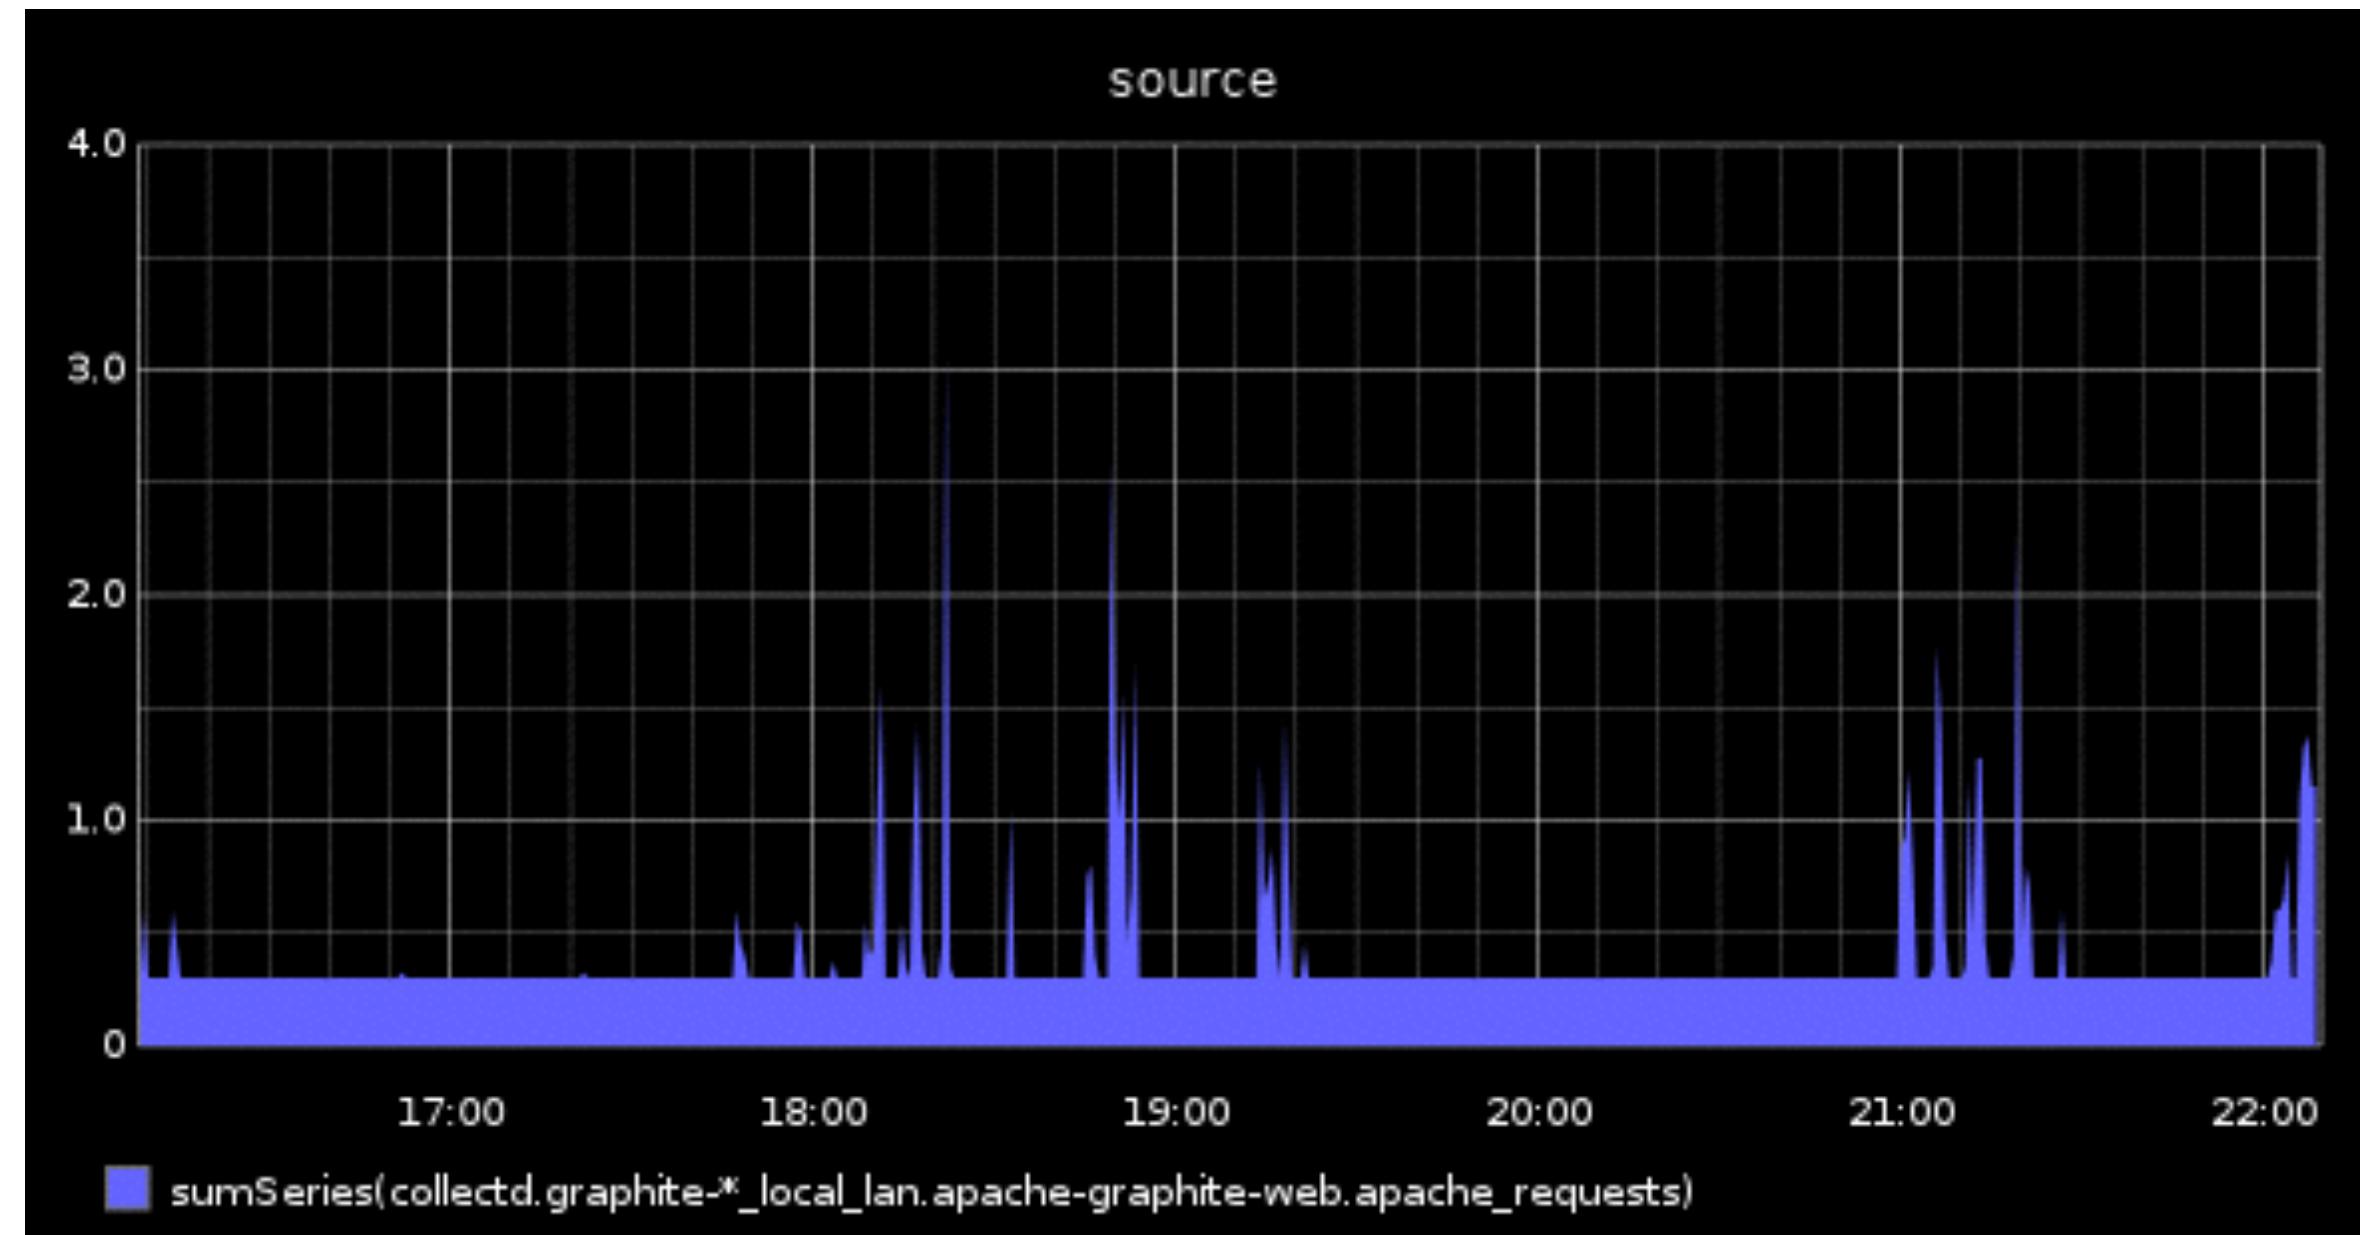

grep

groupByNodes

```
groupByNodes(app.server*.*.reqs.*,
            "sumSeries",1,4)
```

integralByInterval

interpolate

sorta behaves like
`lineMode=connected` except it
also supports a `limit` arg for how
many null values to interpolate over

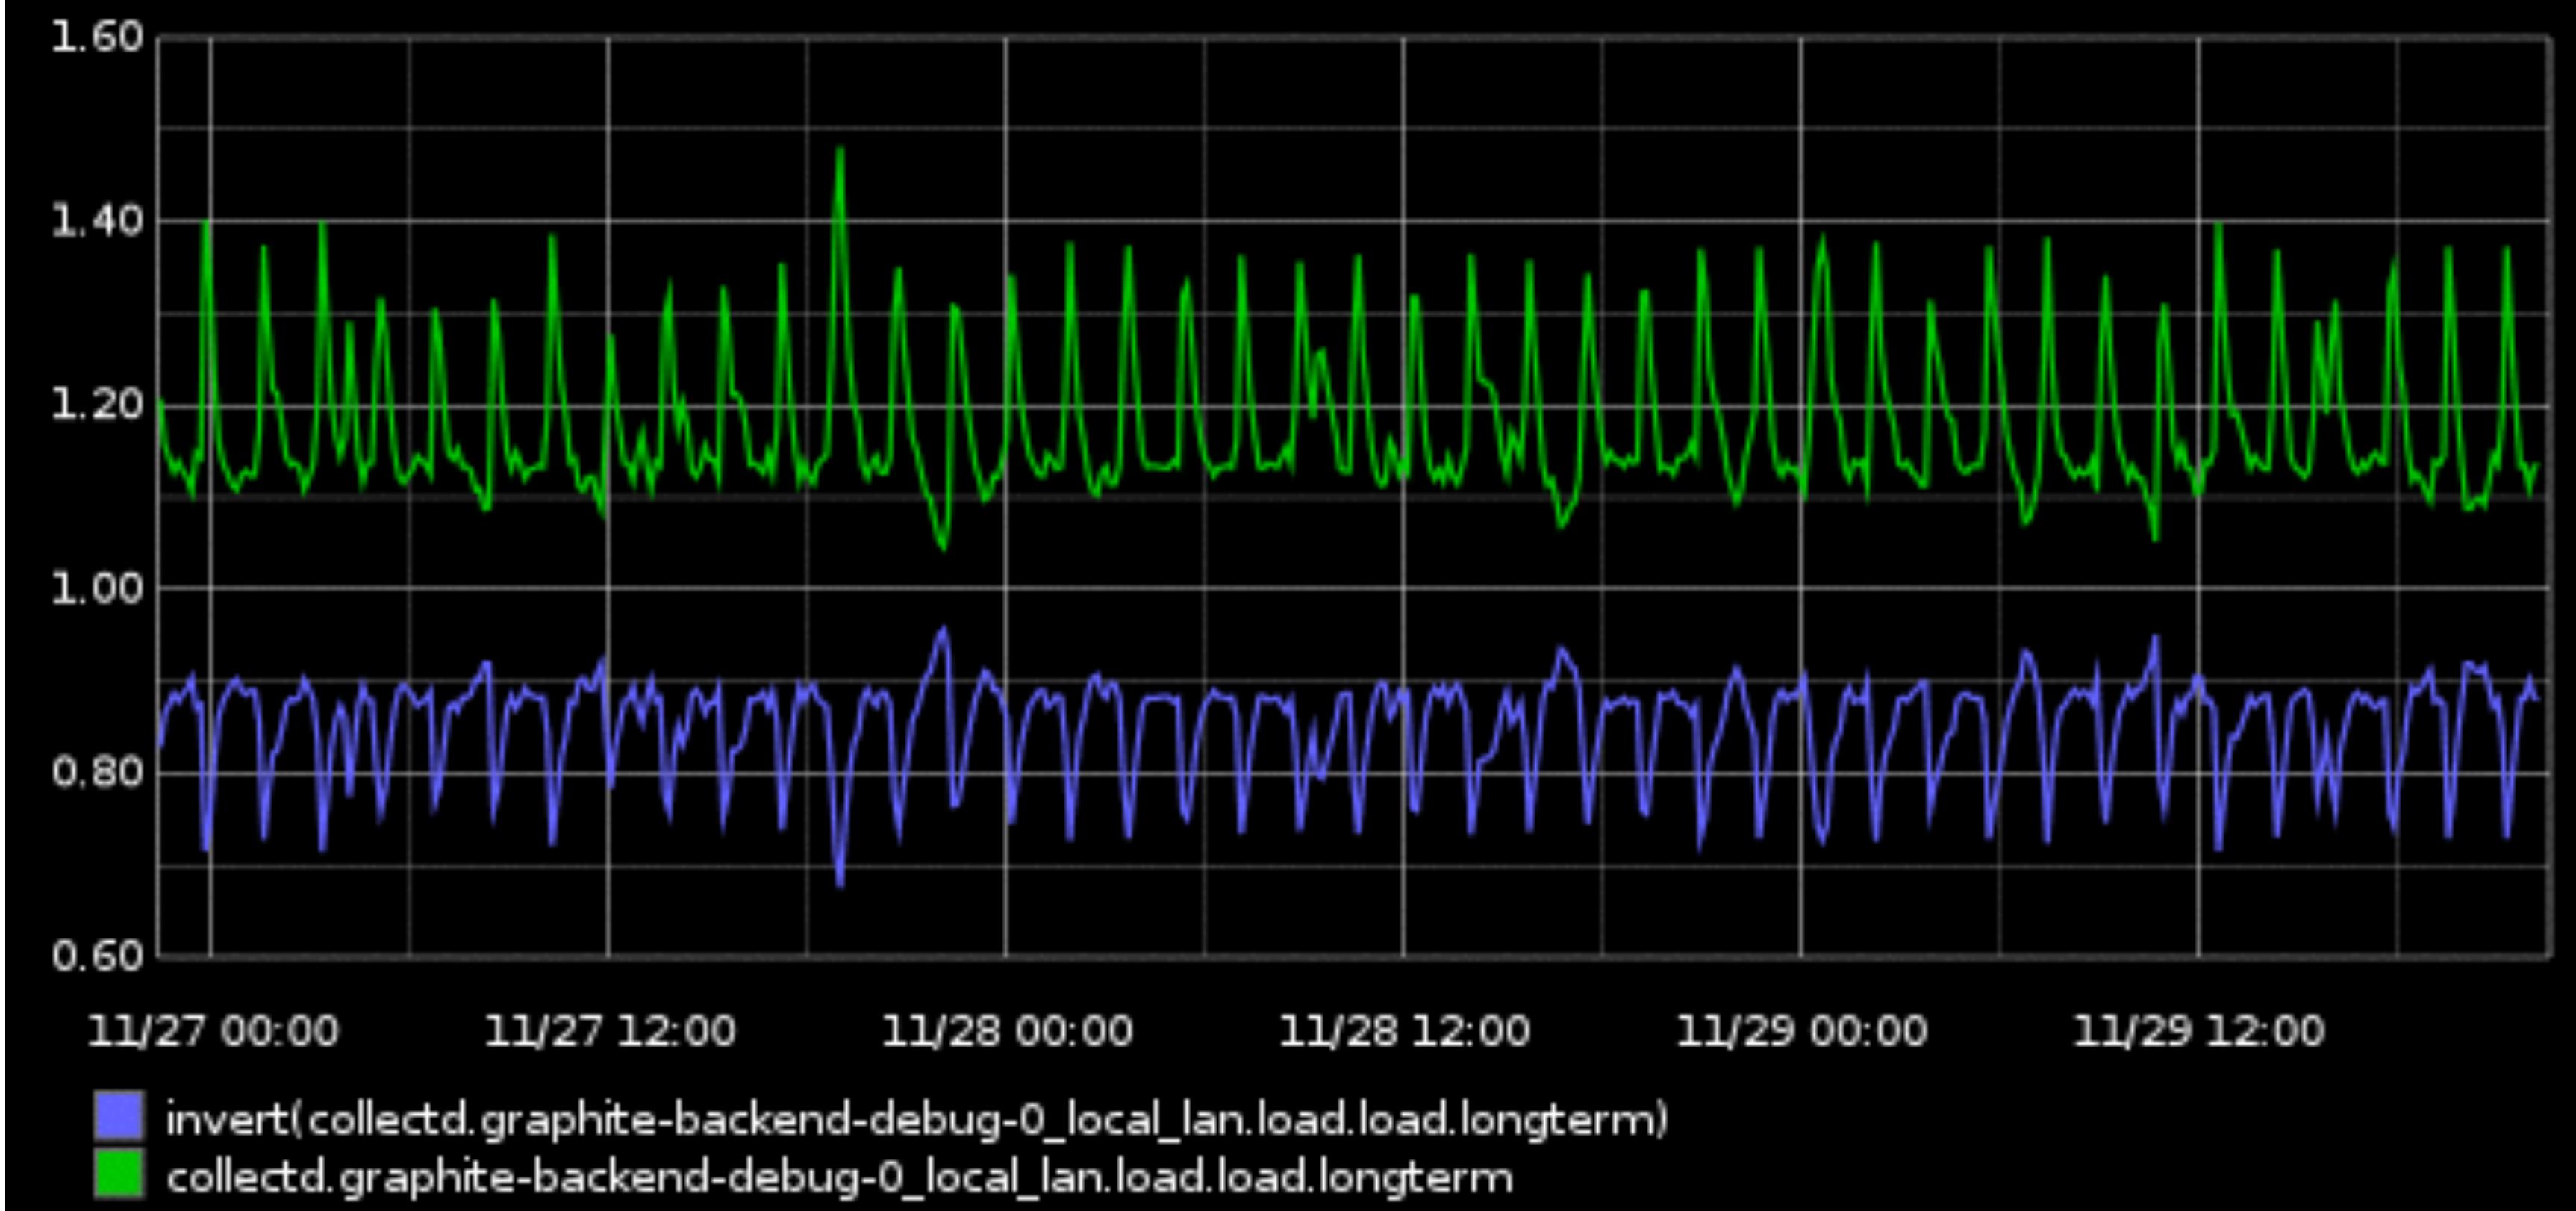

invert

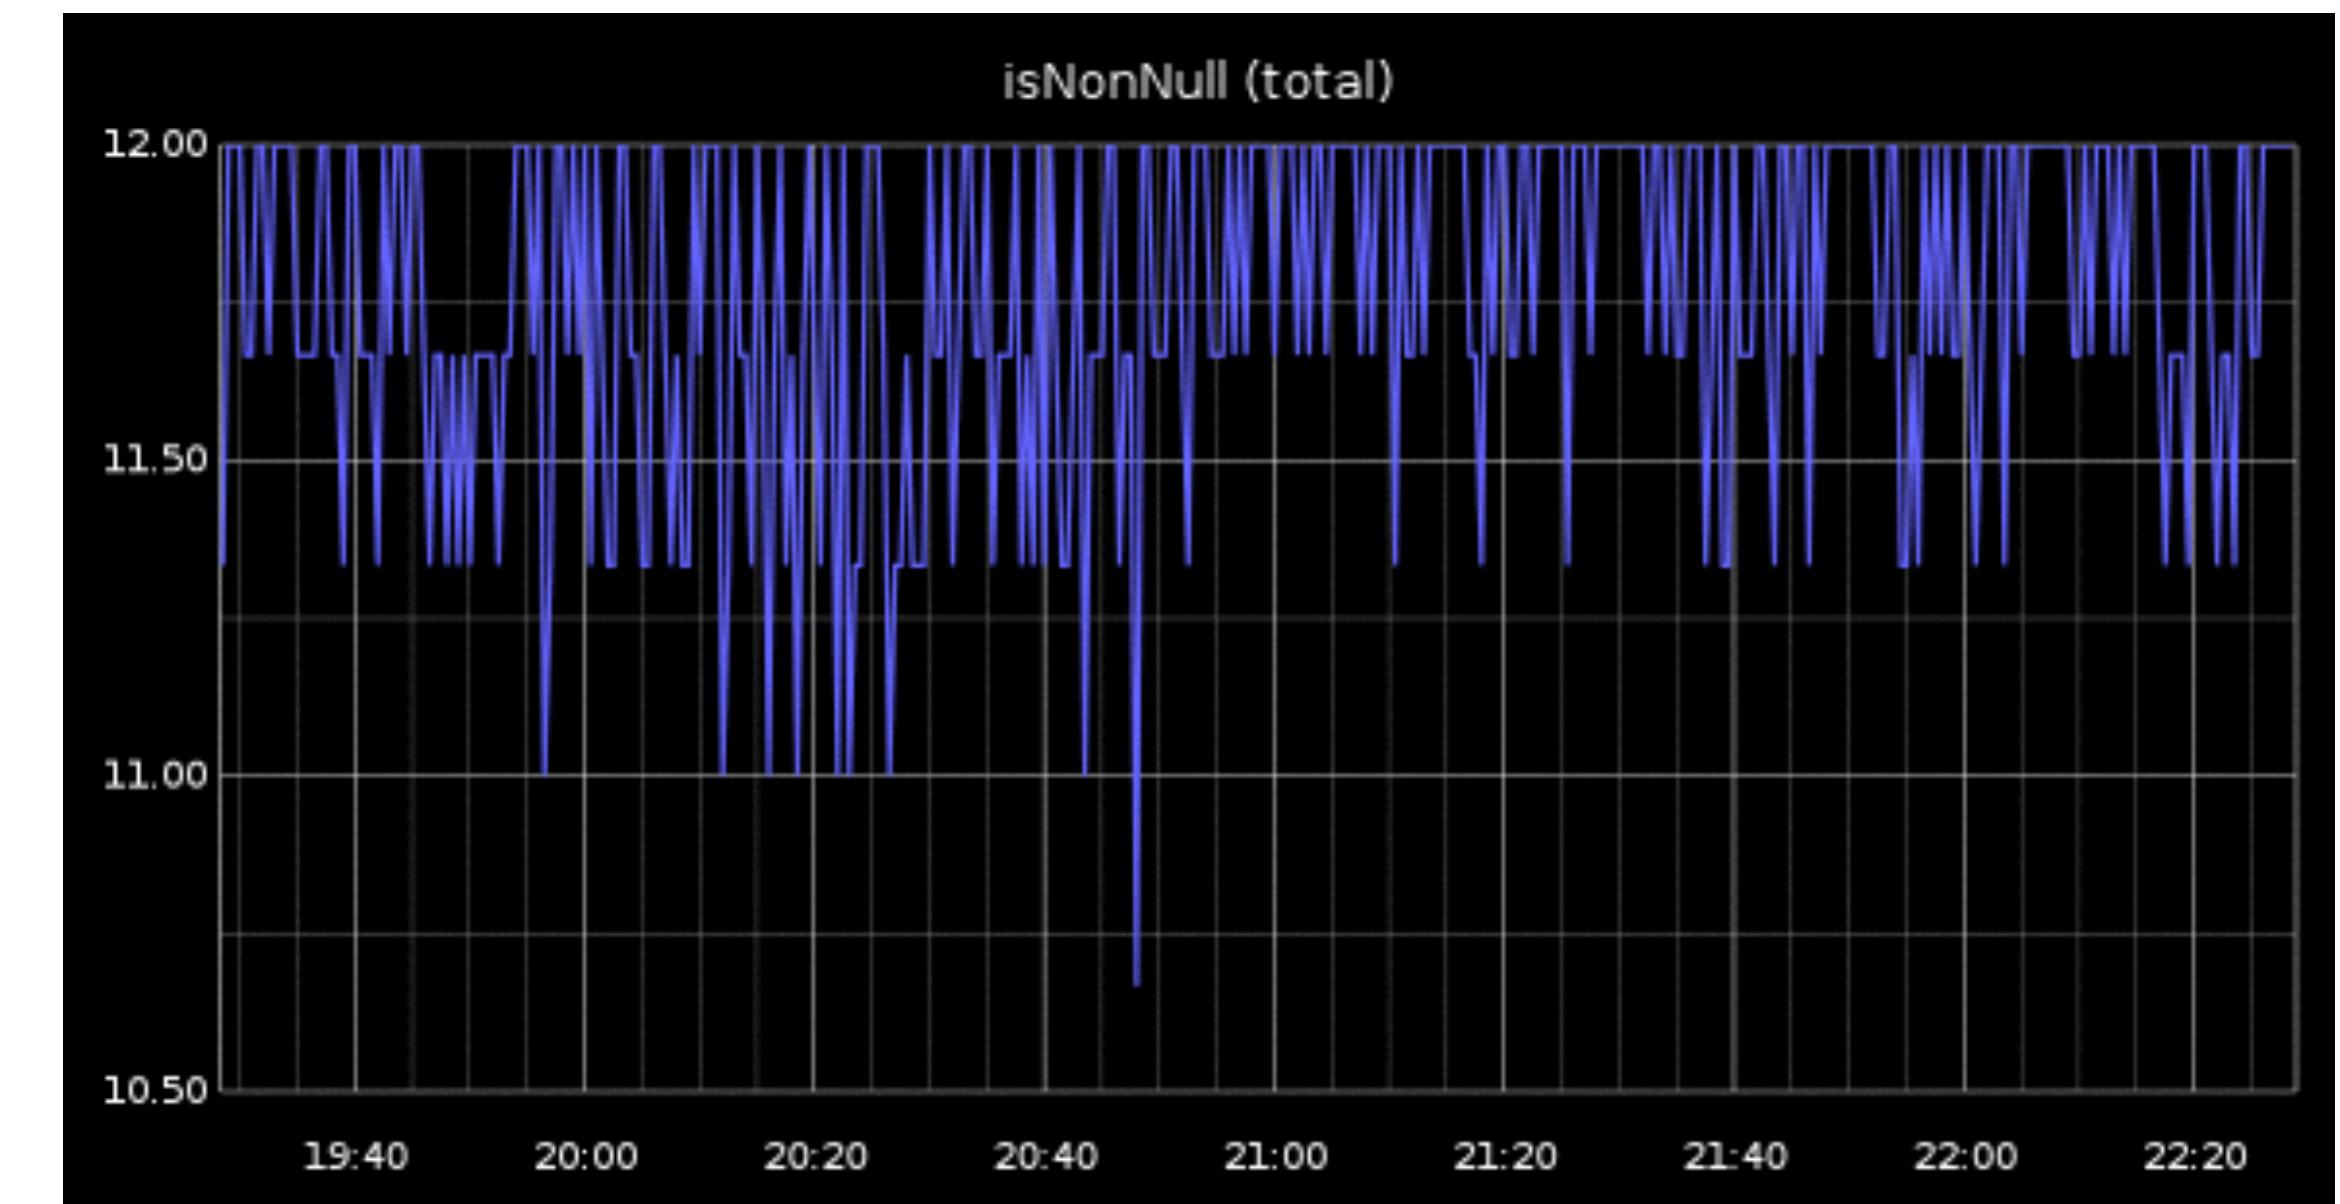

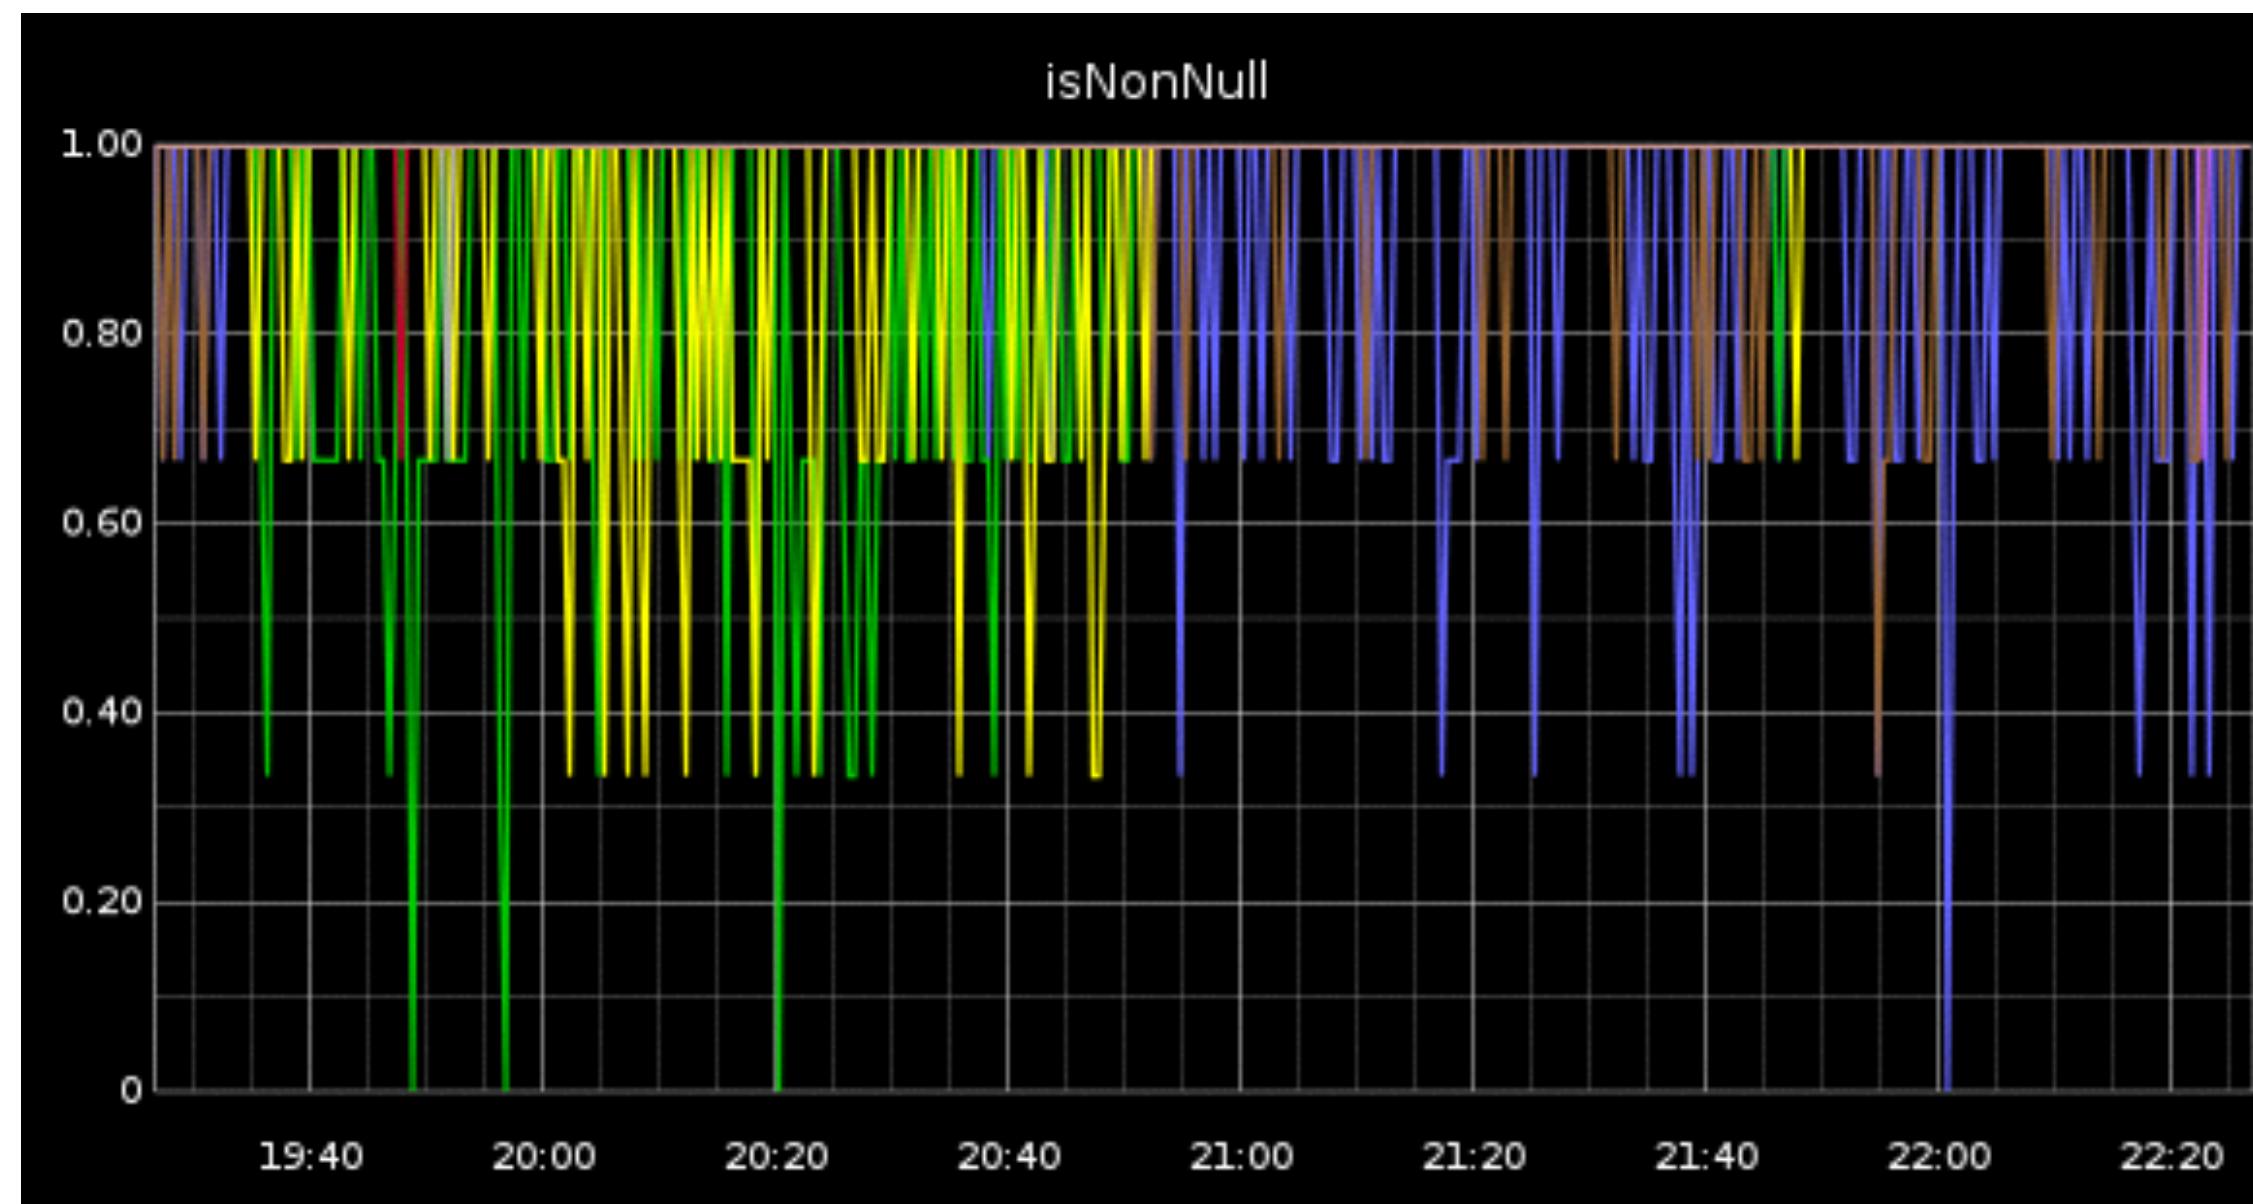

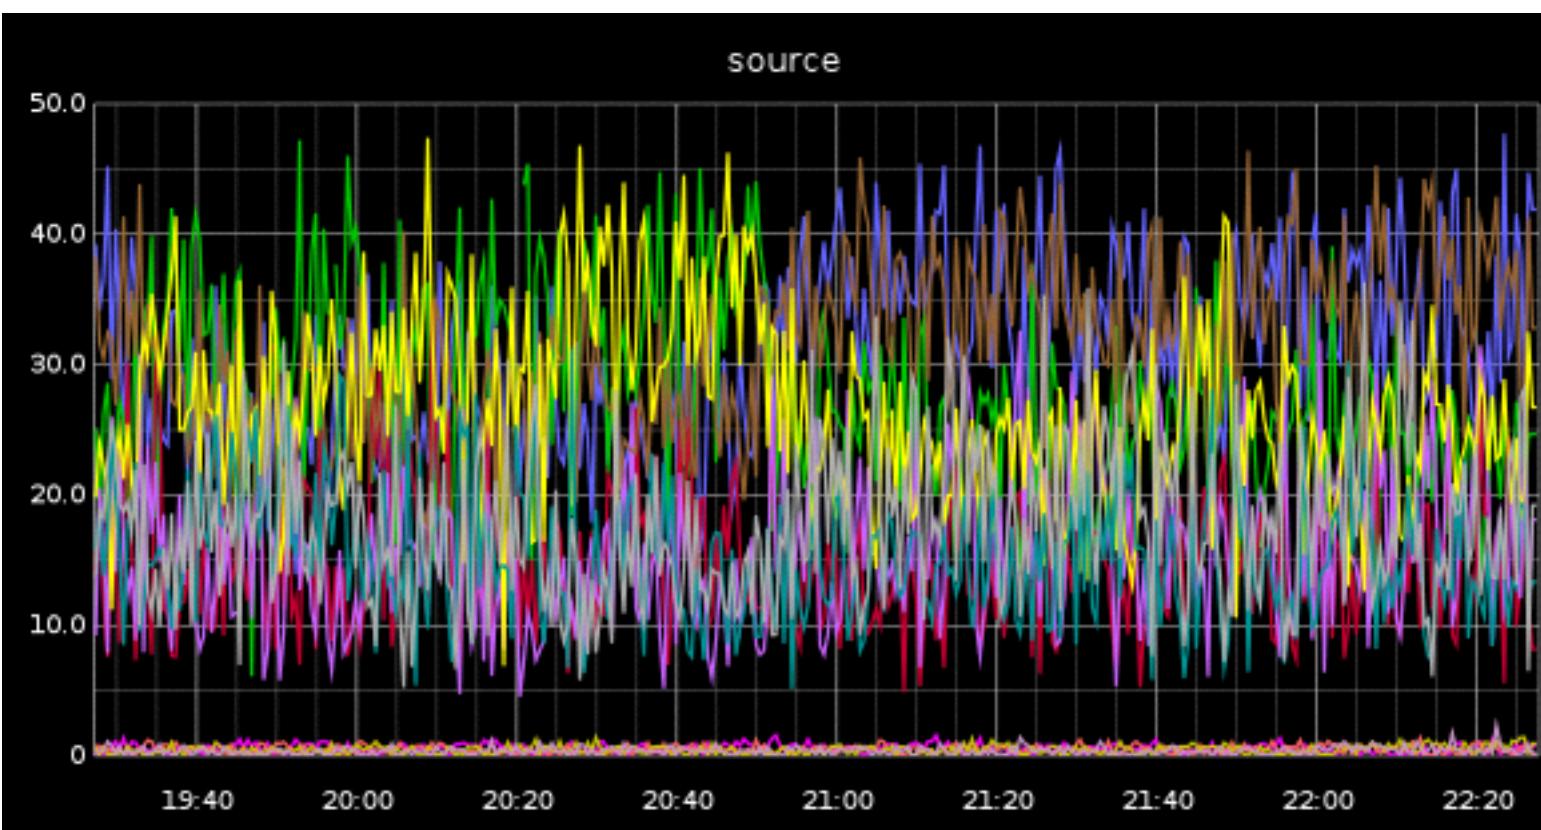

MOVIECLIPS.com

MakeAGIF.com

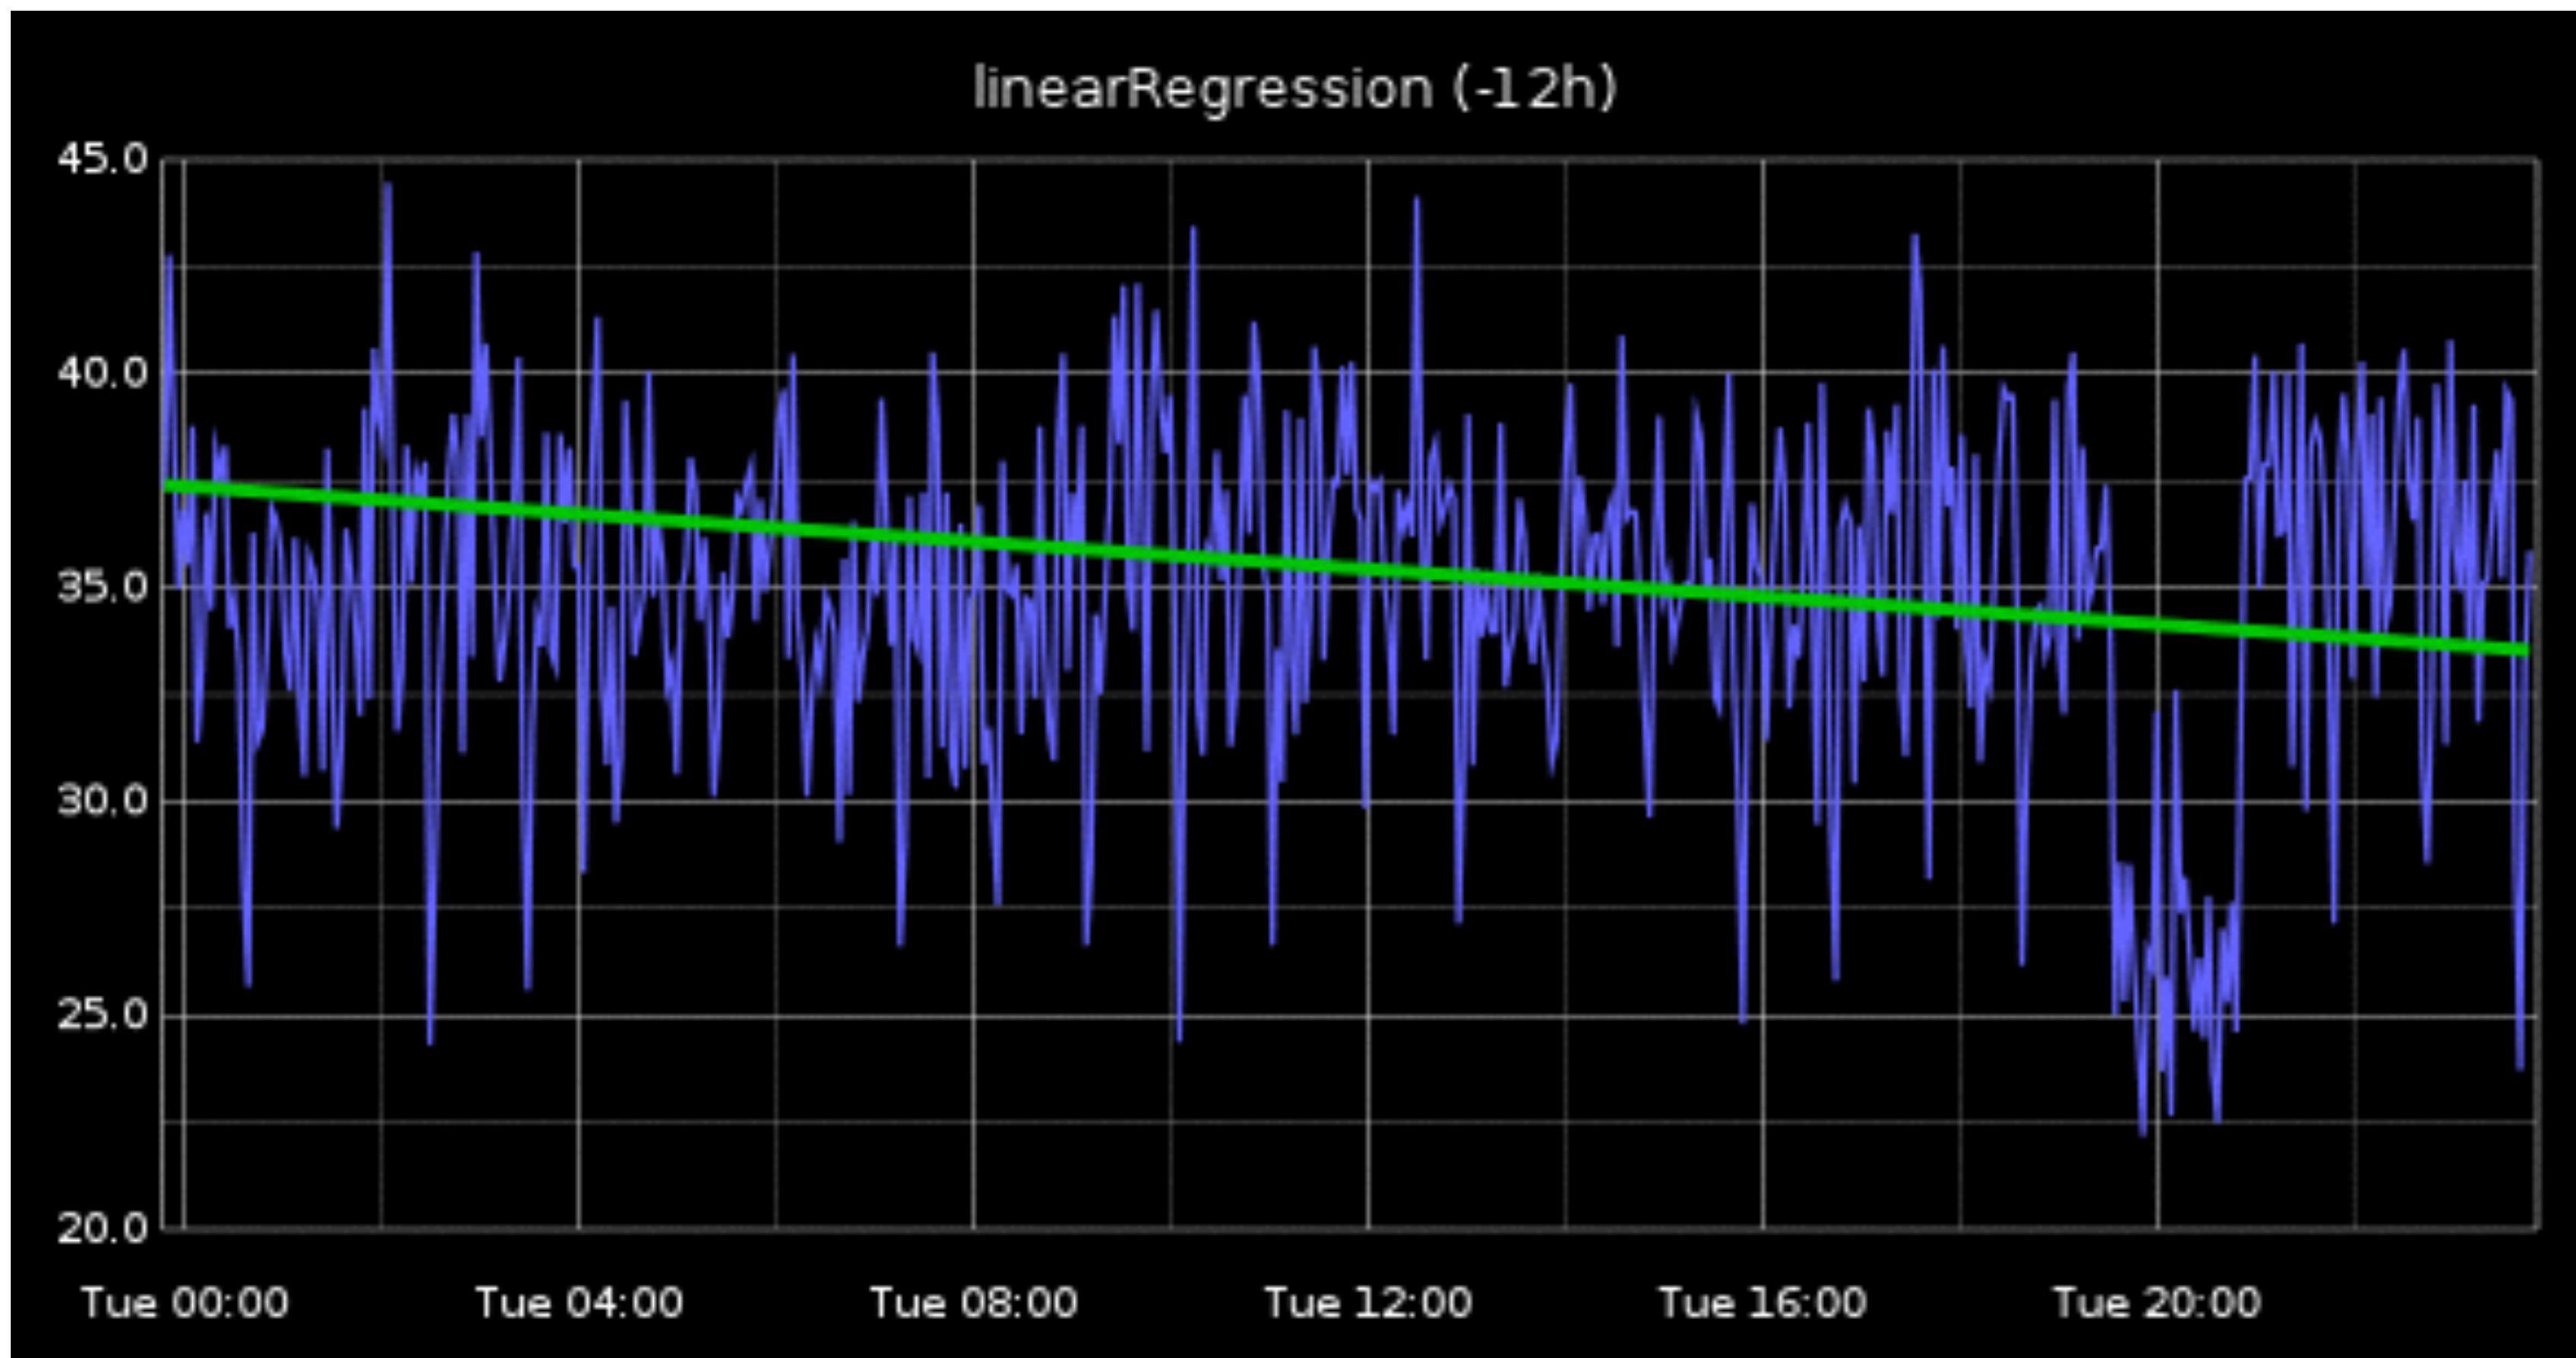

invert (1/y)

isNotNull

linearRegression

linearRegressionAnalysis

Please disperse.

mapSeries
reduceSeries

map and reduce,
nbd (again, rtd)

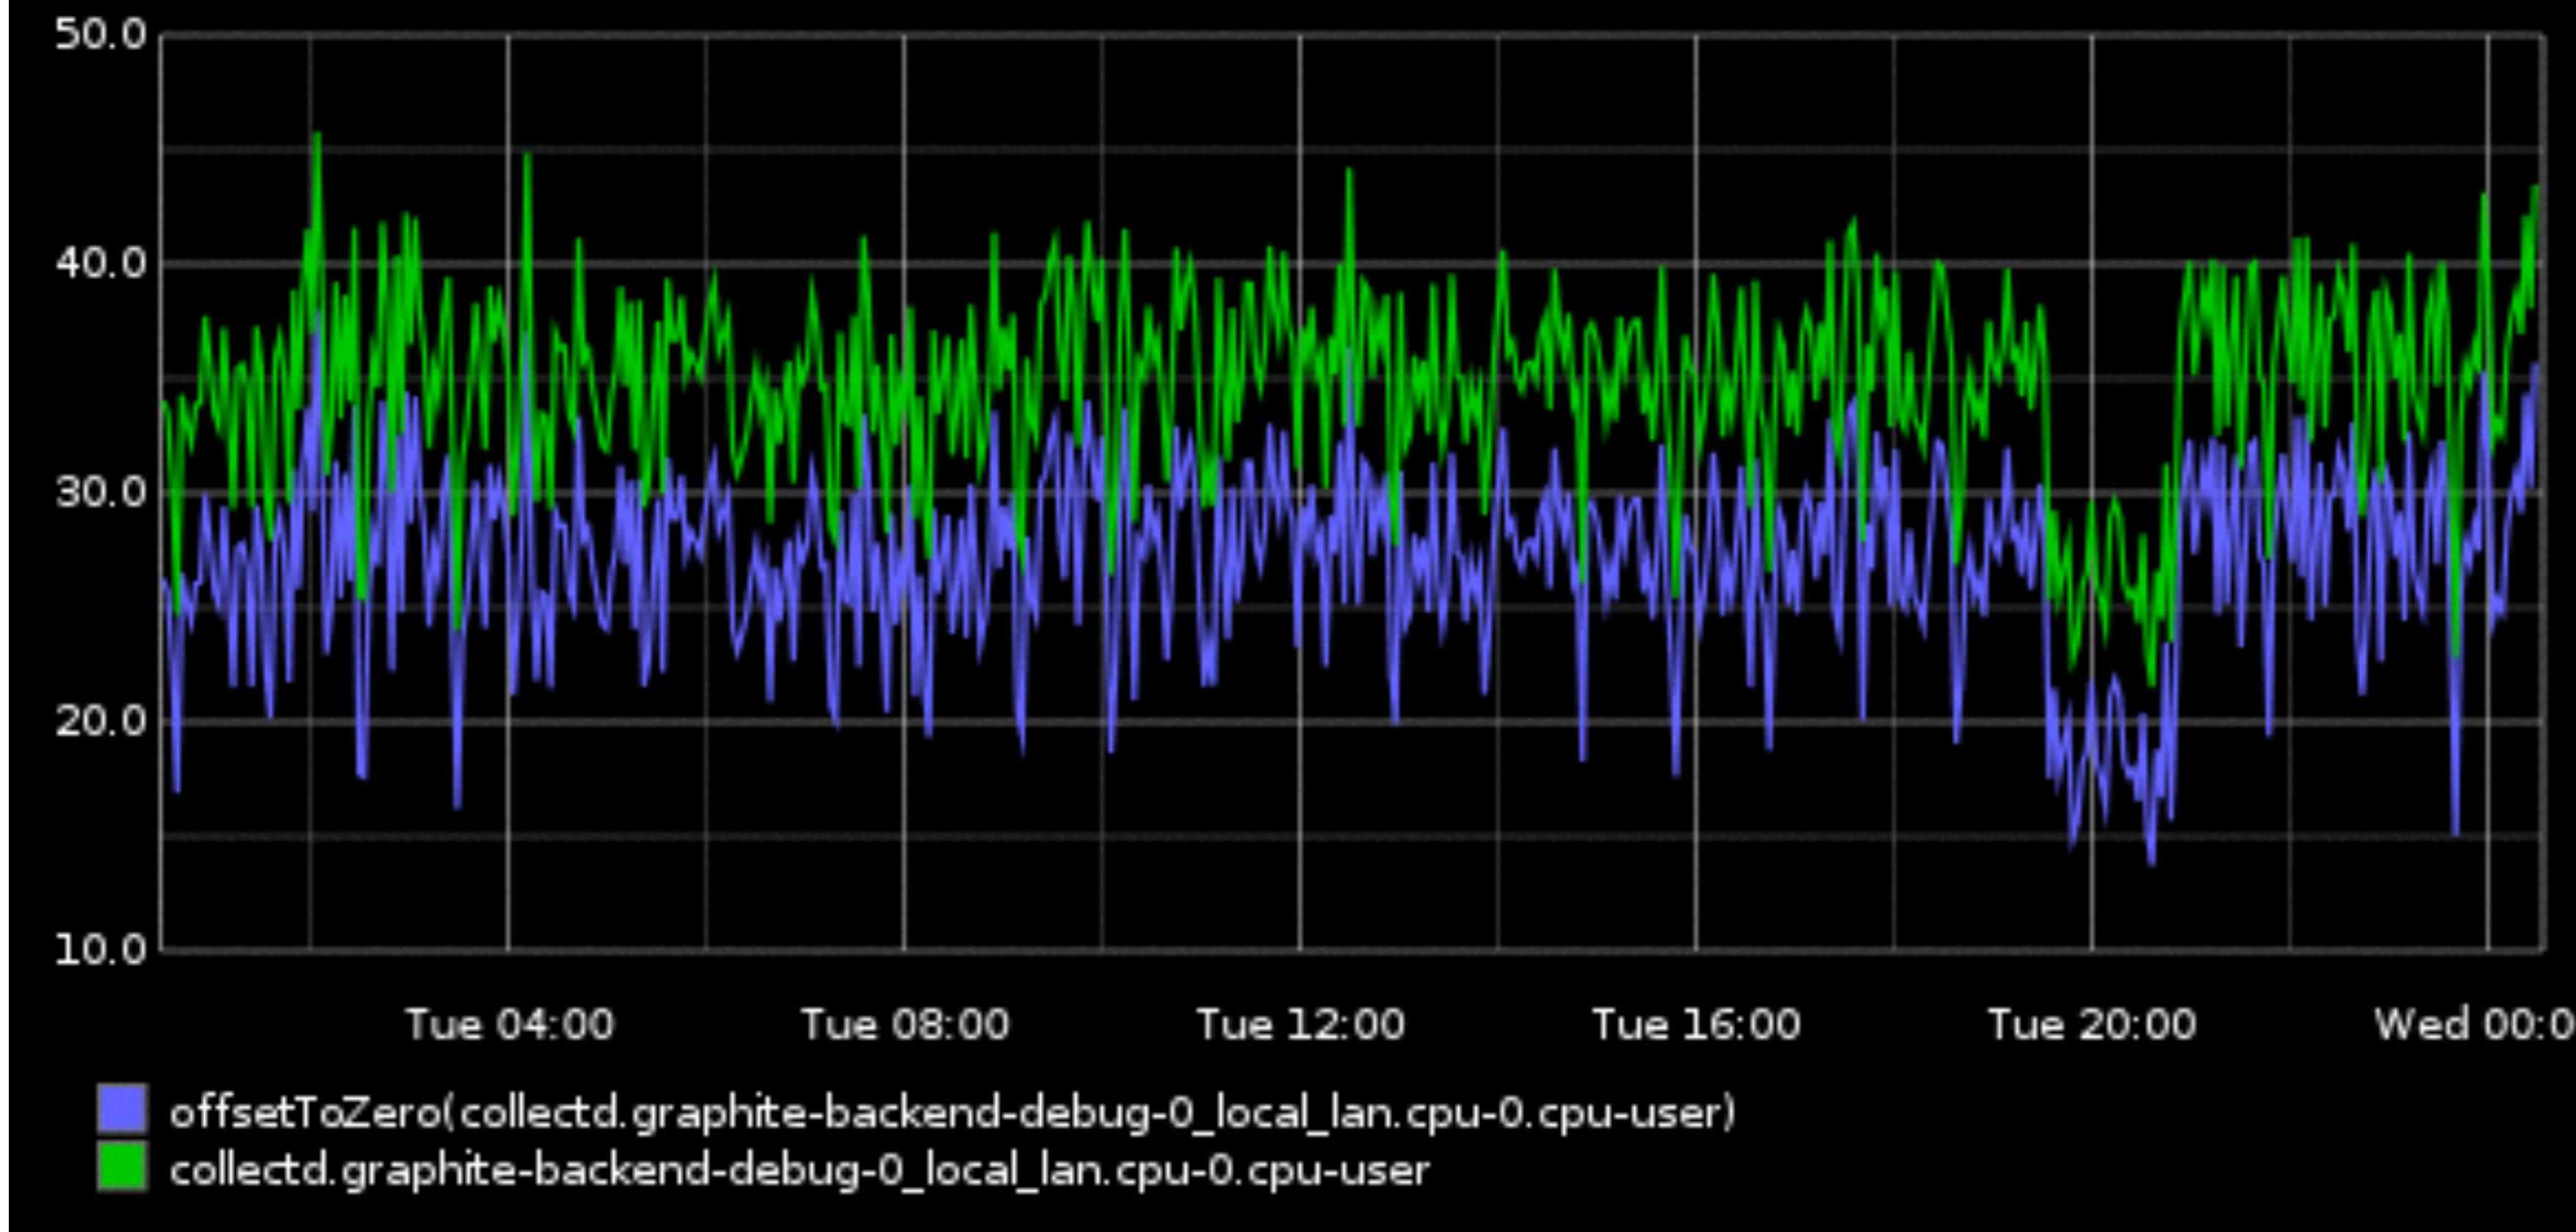

`multiplySeriesWithWildcards`

just like the other
***SeriesWithWildcards**
functions but more fun,
because multiplication

offsetToZero

basically treats the lowest value in
a series as the floor and subtracts
that from all values in the series

offsetToZero

zomg are we done yet

pow

```
power( foo.bar, 10 )
```

factor

removeBetweenPercentile

only render series that have a
value outside the Nth percentile
of all values within an interval

removeEmptySeries

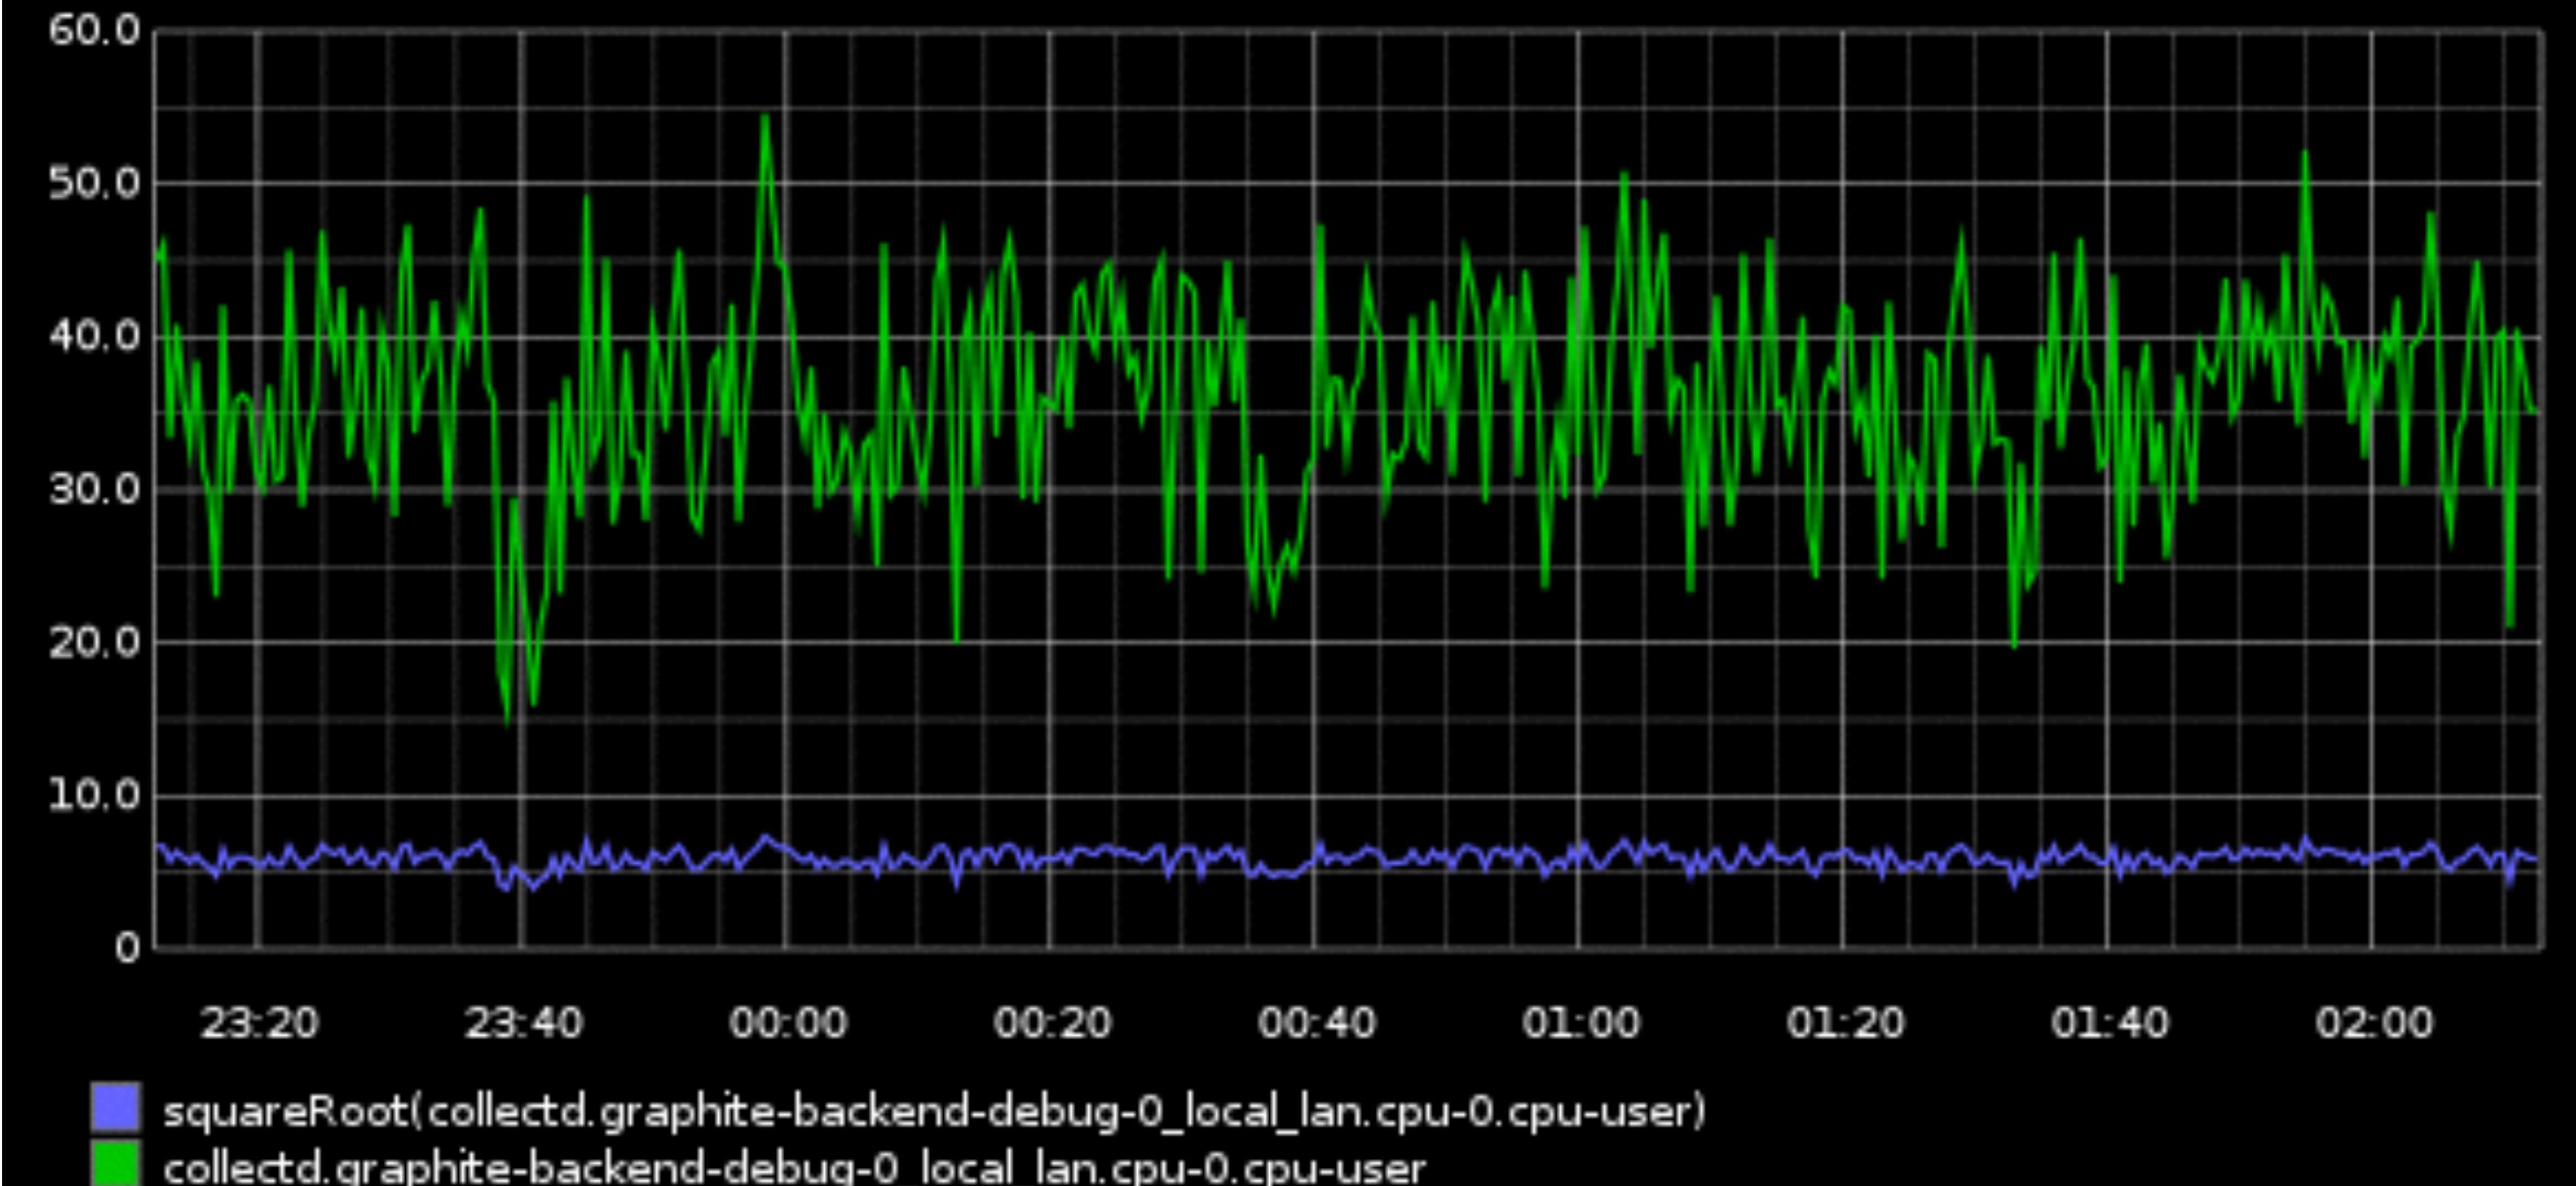

sortByTotal

sort series by the sum
of their total values

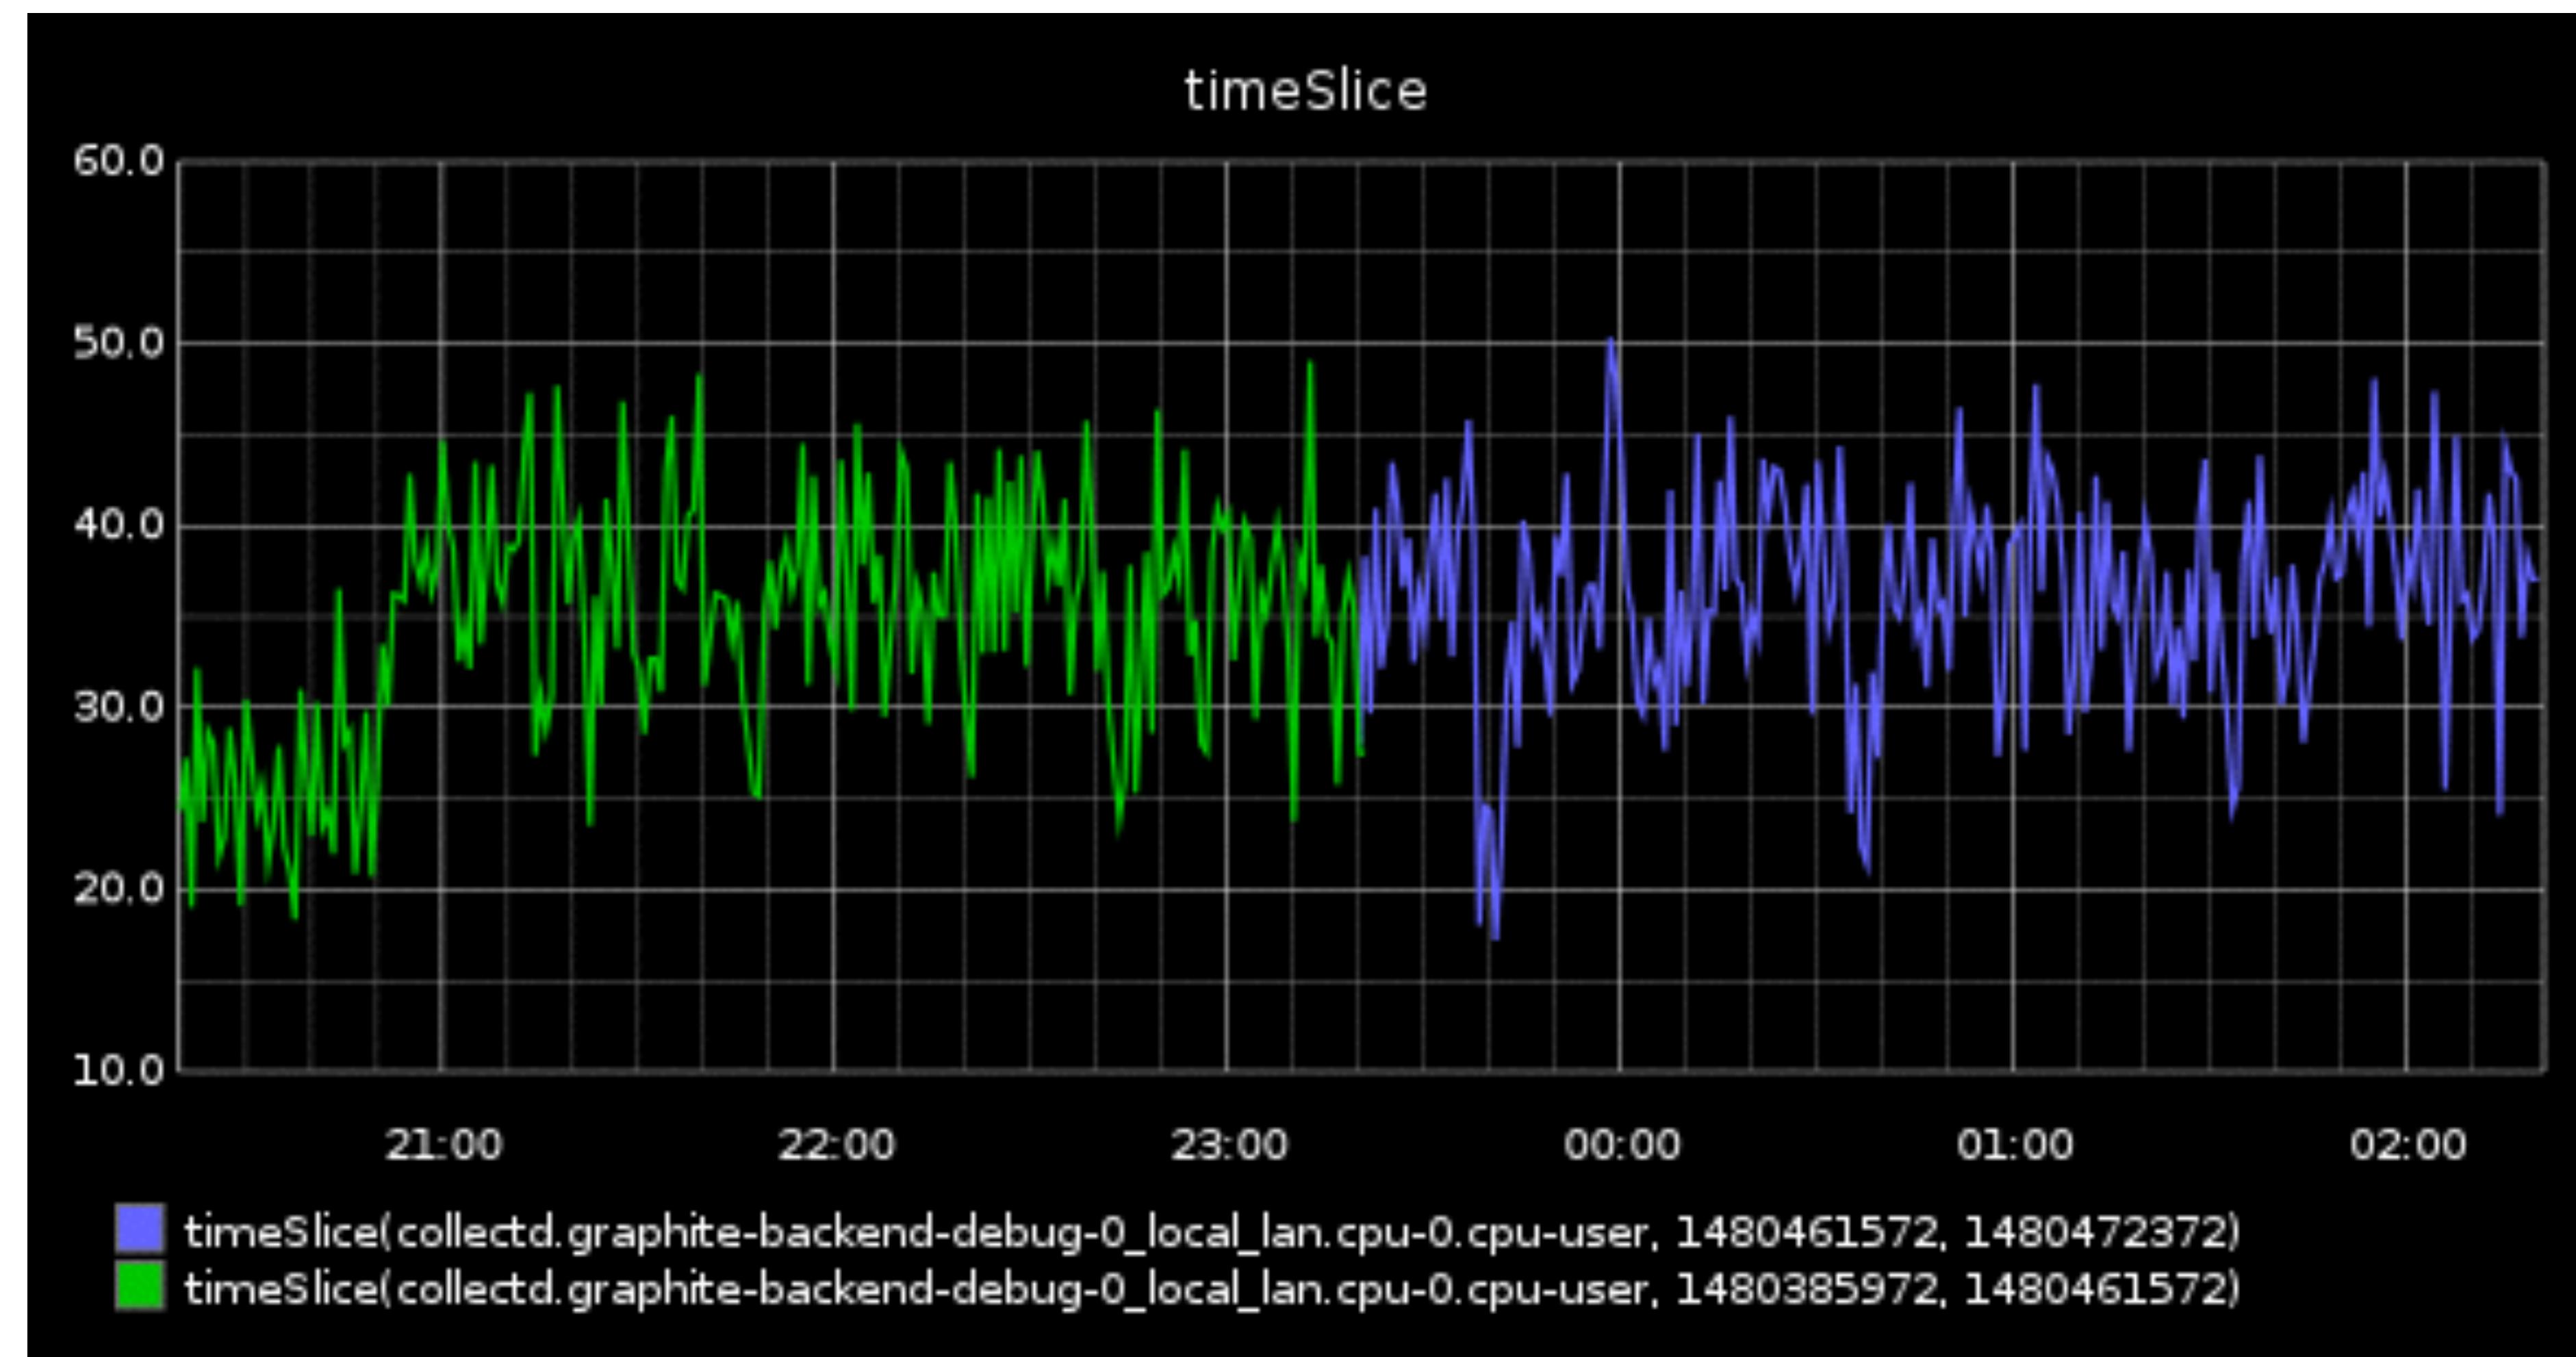

squareRoot

squareRoot

timeSlice

used to limit values to a specific set of intervals within the larger time range, e.g. when you're interested in a contiguous span across disparate metrics

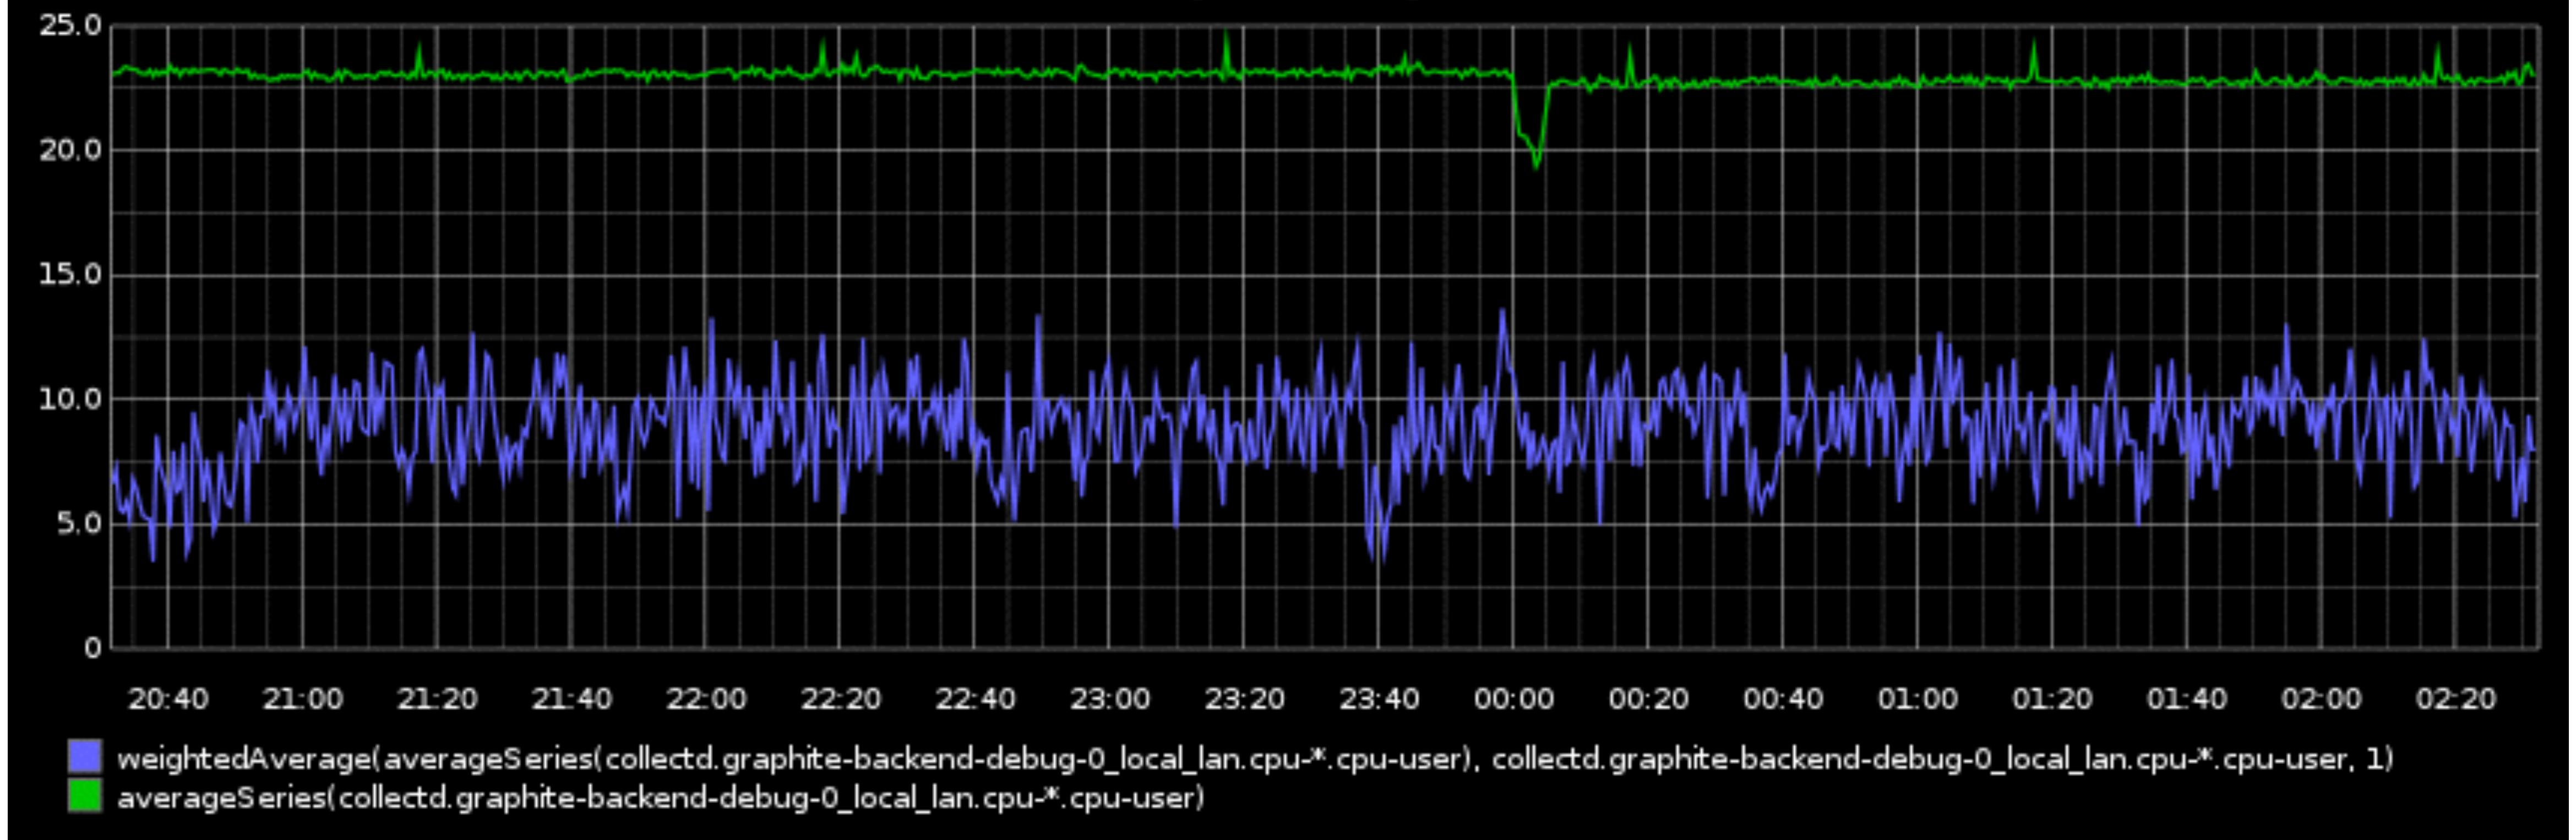

verticalLine

`verticalLine("-1h")`

weightedAverage

weightedAverage

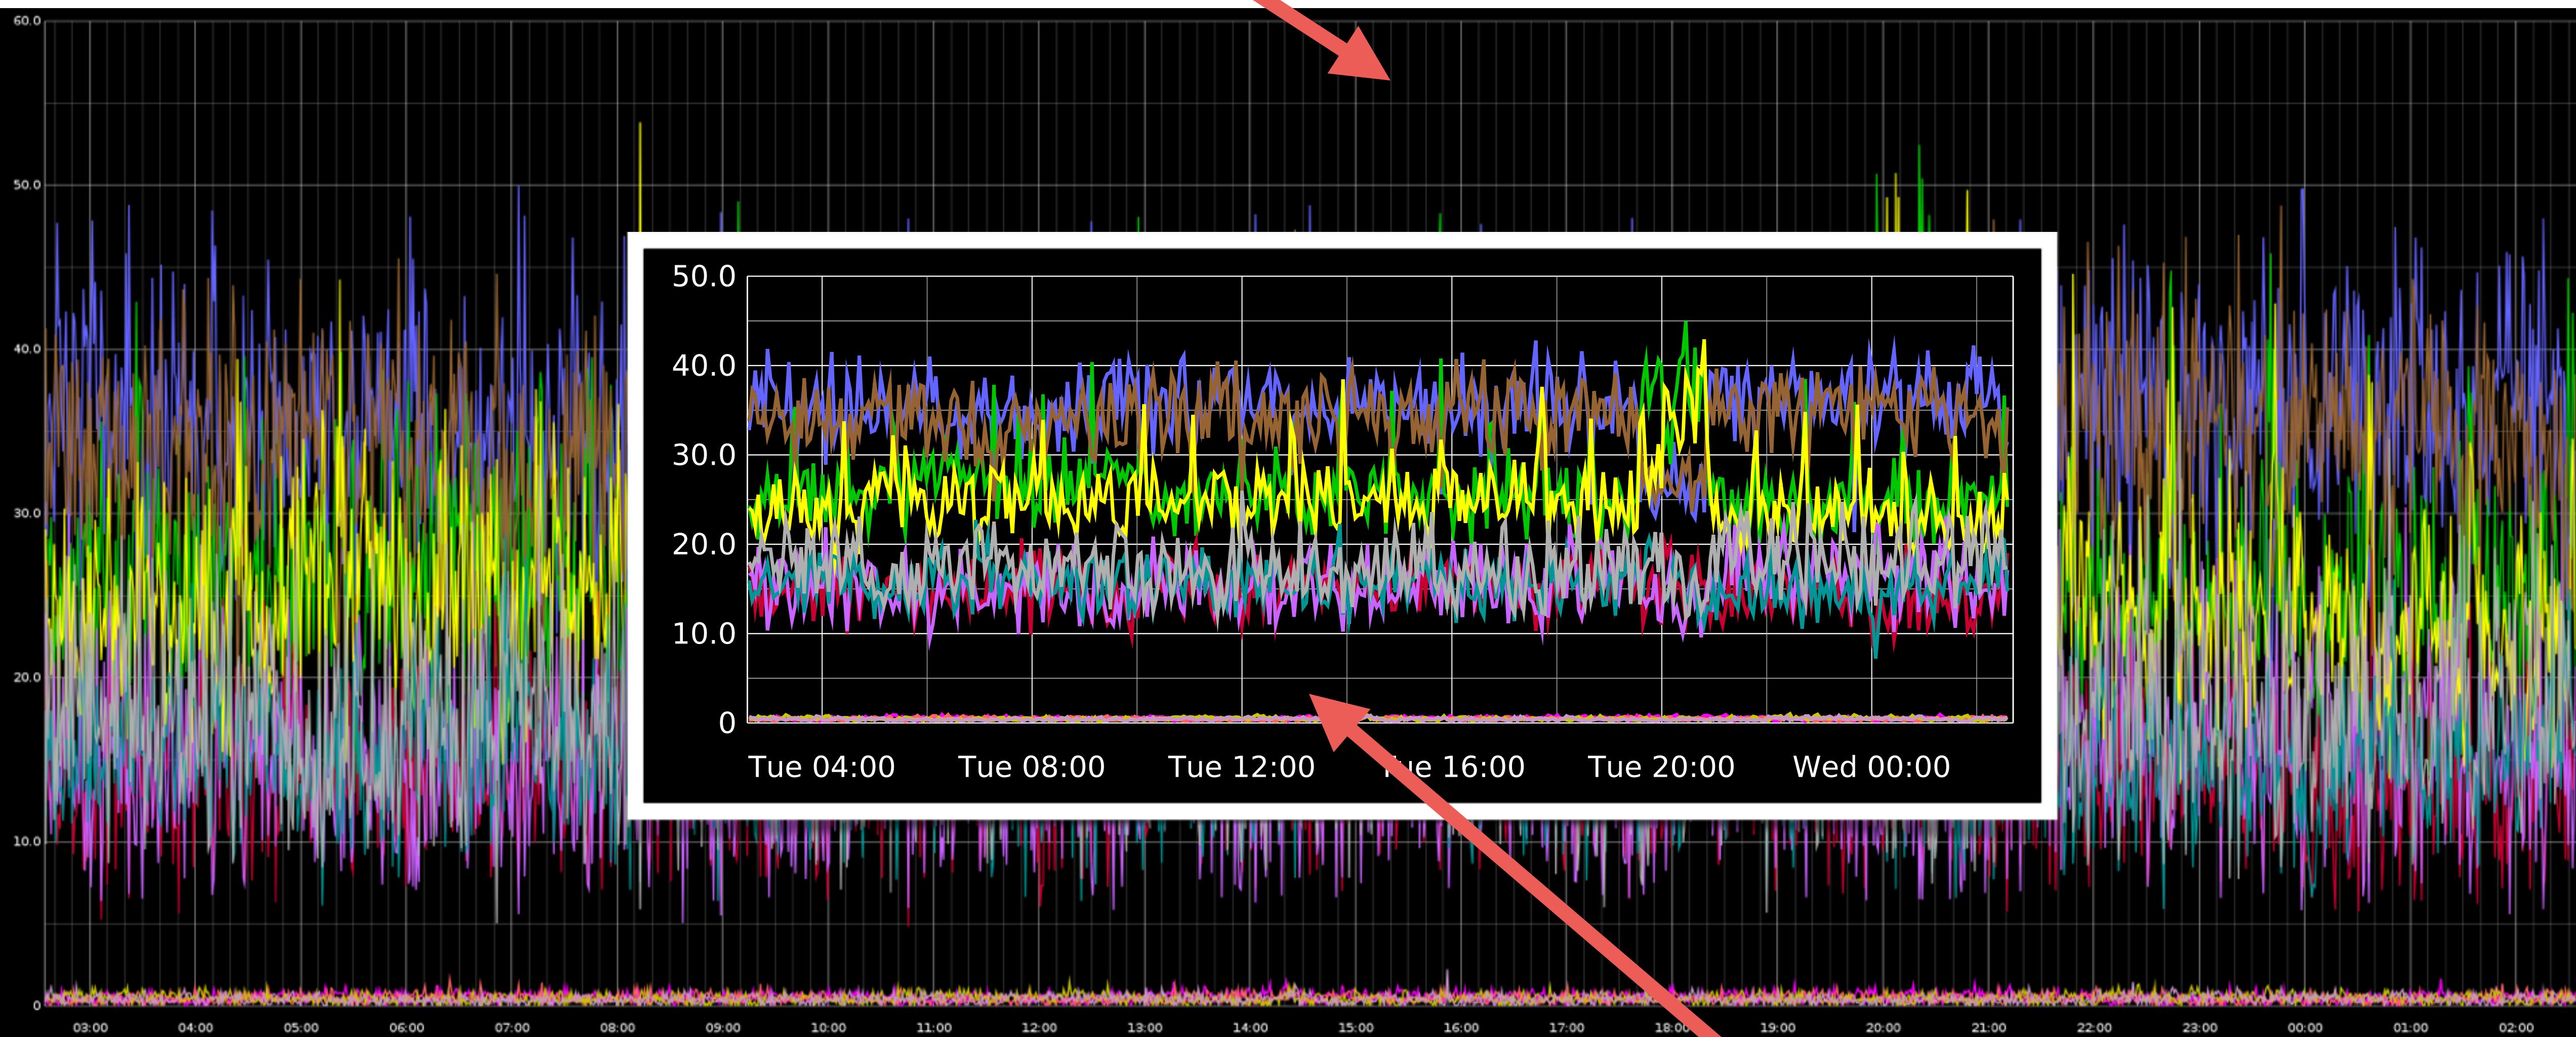

zomg new display
formats

pdf

width=2000&height=800

format=pdf

OBJECTS IN MIRROR ARE
CLOSER THAN THEY APPEAR

SweetMelissa

dygraph

rickshaw

no surprises, work as intended,
useful for quick prototyping with
their respective frameworks

zomg new graph
options

hideNullFromLegend

hideXAxis

noNullPoints
(format=json)

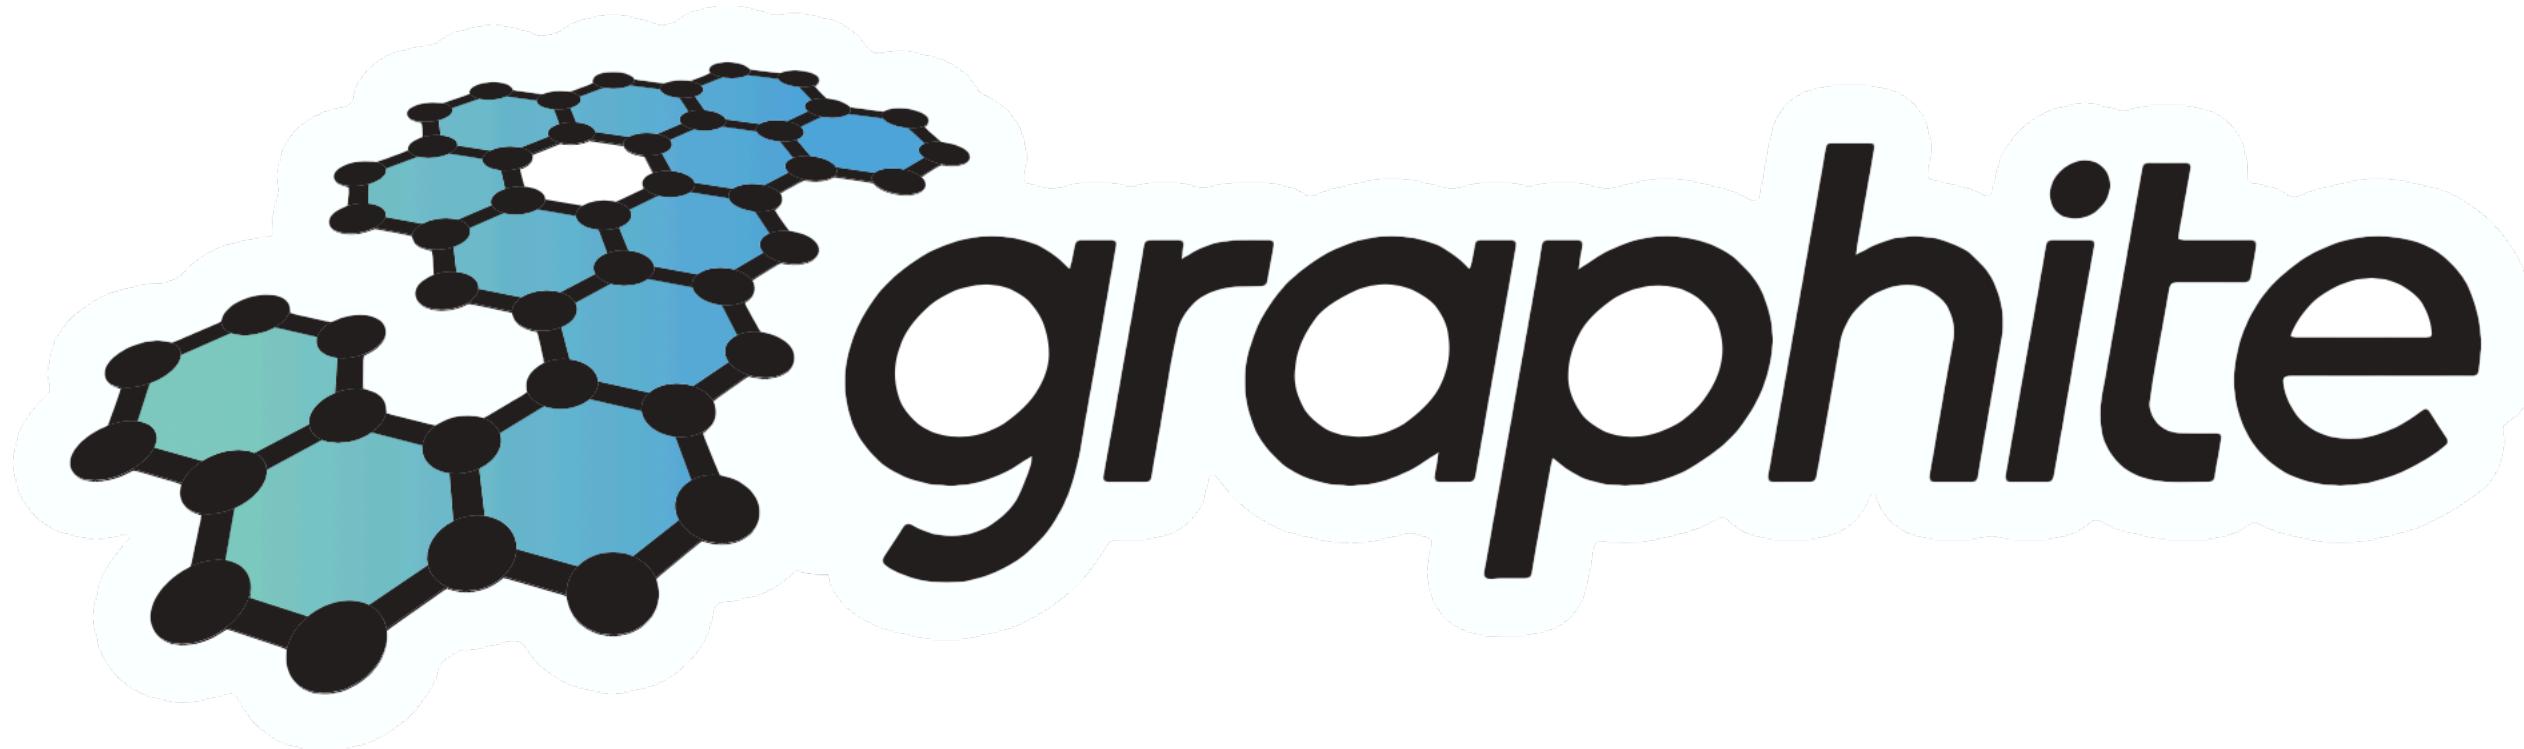

pieLabels
valueLabels
valueLabelsColor
valueLabelsMin

anything else because we
still have some time left
on the clock I think?

live demo 

new logo 

zomg new settings

INTRACLUSTER_HTTPS

MAX_TAG_LENGTH

DATE_FORMAT

WHISPER _ FADVISE _ RANDOM

MAX RECEIVER CONNECTIONS

ok I think that's all but if we have
time left I guess I can answer
questions or rant about Trump or
whatever

thank you
